I do NOT wish to make a personal submission at the hearing, and ask that this written submission be considered.

- 1 The Artificial Reef at New Brighton.
 - This is needed to help revitalise the New Brighton community.
 - Provide a recreational facility for the community.
- 2 Horseshoe Lake Reserve Development.
 - Support the proposed pedestrian bridge across the lake.
 - Still oppose the peninsular near Tangmere Pl being made into an island.
- 3 Frost Rd Cycleway
 - This is needed because of the high number of school age cyclists using the busy road.
- 4 Avon river loop walk from Kerrs Reach and around the Avondale bridge
 - This is needed to make the walk safer for the cyclists and pedestrians that use this route.
- 5 Dog Park relocation at Horseshoe Lake Reserve.
 - The existing Dog Park is not secure for dogs. A small wire mesh is required to prevent dogs from escaping from the fenced area.
- 6 Walkway development in the Travis Wetland.
 - This area needs a link from the car park area to Travis Rd, to enable a circular walk around the Wetlands.
