CITY PLANNING

Since the introduction of the R.M.A. city planning has become an ad hoc laissez faire arrangement. It is driven by people with dollars signs in their eyes and in my opinion has been an unmitigated disaster.

It has produced the urban sprawl we now have + has been a major factor in traffic congestion all over the city. Few school children still cycle or walk to school. This has contributed to epidemics we now have with diabetes + earlier onset of heart disease.

Please continue your submission on the back of this page. You may add more pages if you wish.

Solution

Get rid of it. Replace it with real town planning such as in the Netherlands.
Transport Statement

I agree with the goals designed to provide viable + efficient alternatives to travel by car, but these must be backed up with real funding for

- well designed cycleways
- green strips for pedestrians
- bus lanes so buses run on time during peak times.

The environment that is created for people shapes the decisions they make + cities that cater primarily for motor vehicles have a greatly reduced quality of life.
