Your Submission:

Lake Isaac

Dear Sirs

I cannot believe that a bird strike issue could sink this most needed Watersports facility, I have flown into many airports around the world and many of them seem to be by water of some sort and I have never heard of a plane crashing because of this.

I understand that the land has been gifted so it will save the council a pile of money so you should be 100% behind it. if you build a facility like this you will no doubt be in a position to attract major events like Kayaking and Rowing nationals and world champs, it would certainly become the SI centre of excellence.

A similar facility like this in Nottingham UK has some of the countries best kayakers and rowers based there other none water sports are also based there because of the excellent gym and fitness facilities incorporated into the centre.

They have even held national power boat and jet ski races on the lake so what you can do with the lake is endless and in the end it will all be good for Chch.

don't miss this opportunity because of the very very slim chance that a bird MIGHT one day fly in front of a plane.
