<b>Your Submission:</b>	<p>library - pool closure nm</p> <p>I have signed a petition to save our libraries and would also like to register my strong opposition to any down-sizing of community facilities, including local pools. We see more and more gated and exclusive developments which provide many facilities for their inhabitants and it is sad to think that older parts of the city risk losing these valued facilities. I would have to use my car to go to another library, along with many others. I just endorse all that has been put forward relating to this matter – I can hardly believe that it has even been mooted as a possibility.</p> <p>How about scrapping our sister city links – how many people in this city even know what they are or derive any benefit from them. And why don't you all try mediating disputes such as the row over a fair rental for the use of the strip instead of litigation – and drop any thought of taking the brothel issue to court. Spend our rates on us and our children.</p> <p>Marie Woods</p>
