Your Submission:

Proposed closing of 5 swimming pools

These are Community Assets and should be retained to help foster the physical and mental well being of the local communities.

Only small amounts of money are needed to maintain them in contrast to a proposed \$11 million for the Botanic gardens.

Obesity is a huge problem, swimming is a good exercise to trim weight. Fuel costs are rising so locals will probably choose not to drive great distances to other pools

Local facilities reduce congestion on the roads. Children can bike or walk short distances

Young people must be encouraged to swim competently.

If participation is low then the Council should be promoting their use NOT discouraging people from taking exercise

Closing 3 community libraries

Such facilities are an important part of any community particularly for young children , the elderly and anyone who doesn't wish to or is unable to travel to larger libraries

The Council should be promoting the use of such facilities NOT discouraging it
