Your Submission:

Our Company would like to be included in the Christchurch 2007/2008 Annual Draft Plan.

We draw particular relevance to Council's ongoing service goals within the plan,[page34 Regulatory Services]measuring of achievements & processing regulatory applications within the statutory time frame .

Our proposal is to provide the electronic application that processes all building permits and consent related applications and data services.[this will create a user friendly interface between council & the public]

We embrace Regional and National building compliance matters.

We envisage the automation of Building Consents as a key factor in reducing costs, manpower and damage to the environment while adding benefit to Council Services and infrastructure.

Such an application would generate a permanent source of revenue for Council and reduce manual transactions, while providing many benefits to the user and the community.

Yours sincerely

Paul Fairweather
