Dear Sirs,

**Regarding Investigation into a Waste Water Scheme
At Birdlings Flat**

I am the elected spokesperson for the 10 affected residents at Birdlings Flat who are waiting for clarification and approval to install and/or connect septic systems in the subdivision there.

I understand there is \$40,000 budgetted for 2017 on the LTCCP which could be used to undertake an investigation into a waste water scheme for Birdlings Flat. I am requesting that this amount be brought forward for the budget starting July 1 so that this matter can be dealt with urgently.

There are another 60 sections in this subdivision which will all have to be connected to some waste water system and it is vital this matter be investigated as promptly as possible. As you will be aware, this matter has been delayed already for well over 15 months causing unnecessary hardship to all landholders involved.

The current 10 affected applicants are sympathetic to the Lake Forsyth situation and believe an immediate waste water management investigation is vital. This will benefit future generations and development from both an environmental and planning perspective.

Please give this matter your immediate attention and confirm this money will be brought forward for the above purpose.

Thank you,

**Kaite Hansen
