The purpose of this report is to present to the Board an application from residents of Oakview Lane for rubbish collection from a Private Lane. Permission from the Board is required before collection can begin.

Oakview Lane meets the entire structural requirement for collection. Signed permission has been received from 16 property owners. Two property owners have not responded to letters from the Beckenham Service Centre. No houses have been built on these two properties to date.

The application for collection was submitted on 27 October 1998.

Peter Falconer of the Waste Management Unit has recommended that if the Board approves the collection, and the 2 unsigned property owners object at a later date, then collection could be cancelled.

At present if any property owner in a Private Lane, whose collection is already taking place, objects to the Council collecting, then collection is cancelled for the whole lane.

Recommendation: That the Board approve the commencement of rubbish collection in Oakview Lane.

Chairperson's

- Recommendation:**
1. To adopt the above recommendation.
 2. That the Council review the present policy of cancelling private lane collection if one property owner subsequently objects.
