

5. CANTERBURY UNIVERSITY (22) BUS SERVICE REVIEW

RR 9596

Officer responsible Community Advocate	Author Peter Dow
Corporate Plan Output: Fendalton/Waimairi Community Board Vol 1, 3.1 text 7	

The purpose of this report is to provide the Board with an early opportunity to raise with the Canterbury Regional Council (CRC) any issues regarding this service prior to retendering later in the year.

This review process is undertaken by the CRC to ensure that the bus service in question continues to meet the community's needs. Any feedback from the Board would be included in the service review and incorporated into an issues and options paper to the CRC. Any proposed improvements would then be presented to the community for comment. A copy of the existing bus timetable and route has been circulated **separately** to members.

The Area Engineer advises that he is not aware of any concerns or issues from the community regarding the present service.

Recommendation: That Members advise any comments received or issues raised from the community in respect of the existing service.

Chairman's

Recommendation: That the Board support the continuation of the existing service subject to there being no adverse comment received.
