

**11. HILLMORTON LOCAL AREA
TRAFFIC MANAGEMENT SCHEME**

RR 9370

Officer responsible City Streets Manager	Writer Jeff Owen, Area Engineer Basil Pettigrew, LATMS Co-ordinator
Corporate Plan Output: Local Area Traffic Management	

The purpose of this report is to seek Board approval to have the draft Hillmorton Local Area Traffic Management Scheme (LATMS) document adopted.

During July and August 1998 proposals for traffic calming contained in the draft Hillmorton LATMS were extensively circulated to residents and schools within the area. Copies of the LATMS were also available from Rowley Resource Centre, Barrington Library and Beckenham Service Centre.

Residents were asked to make written submissions to the scheme prior to 31 March 1998.

All comments received have been favourable with the emphasis being to carry out some of the works urgently. Subsequently the majority of the capital works listed in Section 8.0 Implementation have been inputted in to the City Streets budget.

Minor recommendations to the format of report, to improve clarity have been received and the draft has been modified accordingly.

Taking the above points into consideration it is concluded that the Hillmorton LATMS reflects the needs of the community and may be adopted by the Board for progressive implementation as funds become available.

A copy of the draft LATMS will be circulated to Board members with this agenda.

Recommendation: That the Hillmorton LATMS be adopted by the Board as a final document.
