

## 9. BEVERIDGE STREET RESIDENTS' PARKING AREA

RR 9724

<b>Officer responsible</b> City Streets Manager	<b>Author</b> Peter Atkinson , Area Engineer (Central City)
Corporate Plan Output: On Street Management	

The purpose of this report is to extend an existing residents parking area to make provision for two vehicles.

There are two properties on the south side of Beveridge Street that have narrow frontages and cannot provide any off street parking. These properties are side by side. There is an existing resident car parking space in operation for one property and the new owner of the adjacent property has also requested a similar space. It is proposed to extend the existing resident car parking to the east to make provision for an extra vehicle.

This proposed extension is supported by the Parking Operations Manager.

**Recommendation:** That a parking space for a residents car only be created on the south side of Beveridge Street commencing at a point 110 metres measured in a westerly direction from a point opposite the western kerbline of Durham Street and extending in a westerly direction for a distance of 6 metres.

**Chairman's Recommendation:** That the above recommendation be adopted.
