The purpose of this report is to seek elected member input into the 2000 planning process and to outline the 2000 Plan timetable.

For a number of years now Committees have combined the end of year reporting with the forthcoming planning process. This approach works well as it ensures that matters arising from the review of past performance are fed directly through to the forthcoming Plan. For example if the Committee is concerned about the adequacy of some performance measures for 1998/99 then it is important that amendments are made to the 2000 Plan. Similarly if the Committee feels that past performance has indicated that some objectives are not relevant, it can request that this matter be reviewed as part of the planning process.

It is intended that these and similar type issues be incorporated into a Planning Statement which would be used by Units when they prepare their draft budgets.

It may be that nothing of any substance arises from the monitoring process. In these circumstances there is therefore no need to prepare a Planning Statement.

The more detailed issues such as project substitutions and new projects for years one and two will be left until February 2000. In February Standing Committees will have before them the draft operating and capital budgets and they will be in a better position to make these decisions.
