

7. TEMPLETON STORMWATER SOAKAGE

Officer responsible Water Services Manager	Author Chris Fourie
Corporate Plan Output: 9.3.52 Templeton Stormwater Drainage Scheme	

The purpose of this report is to update the board on progress with the Stormwater Soakage Basin design for the Railway Terrace site. A preliminary concept for the site was presented earlier this year, and circulated in the Templeton Residents Association newsletter.

The Planning and Investigations team has engaged sculptor Graham Bennett to work with them to progress the preliminary concept. A short presentation, will introduce Graham and the brief he is working to. The ‘developed’ concept will then be presented to the Community Board some time after the end of September 2000.

Recommendation: That the report be received.

Chairperson’s Recommendation: For discussion.
