| Corporate Plan Output: Regional landfill planning | |

The purpose of this report is to raise the issues of a Landfill Project Working Group for shareholders in the proposed new regional landfill.

Items dealing with the regional landfill project often take up a considerable amount of time, and are of less interest to the non-landfill members of the Subcommittee. A separate Landfill Project Working Group for shareholders to deal exclusively with issues dealing with the proposed landfill project is therefore proposed.

Recommendation: That, where necessary, shareholders meetings be called prior to Canterbury Waste Subcommittee meetings for shareholders to discuss the landfill project.

Chairman's Recommendation: That the above recommendation be adopted.
