

## 16. CLISSOLD STREET - KERB AND CHANNEL RENEWAL

<b>Officer responsible</b> City Streets Manager	<b>Author</b> Brian Boddy, Area Engineer
Corporate Plan Output: 1999/2000 Capital Works Programme	

The purpose of this report is to request that the Board approve the **following** publicity plan for the renewal of the kerb and channel in Clissold Street for distribution.

### BACKGROUND

Clissold Street is on the Capital Works Programme to have its kerb and dish channel renewed in the 1999/2000/2001 financial years. Different options have been considered and following traffic and resident surveys the proposal detailed on the plan has been drawn up. As shown, it is proposed to construct a threshold at each end of the street with a kerb extension on one side of the road only. This should slow down traffic entering the street and identify the street as a local road, while still allowing left and right turning vehicles to exit the street at the same time.

The Environmental Policy and Planning Units budget allows for the undergrounding of the overhead electrical services in the street at the same time as the kerb and channel is renewed.

Existing crab apple street trees shall be retained.

### PROPOSAL

To distribute the publicity plan showing the location of the proposed kerb and channel and associated works in Clissold Street for public comment.

**Recommendation:** That the information be received and the publicity plan be approved for distribution and comment.

### Chairman's

**Recommendation:** That the foregoing recommendation be adopted.
