

13. WORDSWORTH STREET P5 LOADING ZONE

Officer responsible City Streets Manager	Author Peter Atkinson , Area Engineer (Central City)
Corporate Plan Output: On-Street Management	

The purpose of this report is to create a new P5 loading zone on the northern side of Wordsworth Street between Gasson Street and Colombo Street

A request has been received from the operator of a small lunch shop for a short term parking restriction. There are no parking restrictions in this area and this section of Wordsworth Street is becoming under increasing pressure for parking. There are limited off street parking facilities for this shop and as a result double parking occurs and motorists often park over driveways.

To assist with traffic problems in this location it is proposed to create a P5 loading zone. The adjacent business and the Parking Manager support this restriction.

Recommendation: That a P5 loading zone be created on the northern side of Wordsworth Street commencing at a point 72 metres measured in an westerly direction from a point opposite the western kerbline of Gasson Street and extending in a westerly direction for a distance of 12 metres.

Chairperson's Recommendation: That the Officer's recommendations be adopted.
