

## 9. WATERWAYS AND WETLANDS BUS TOURS

<b>Officer responsible</b> Water Services Manager	<b>Author</b> Christine Heremaia
Corporate Plan Output: Education Programme 9.3.16	

The purpose of this report is to inform Community Boards and the Parks and Recreation Committee of the Waterways and Wetlands Bus tours of the Avon, Heathcote and Styx Rivers. These tours are focused towards the general public and will form part of the Waterways and Wetlands Education Strategy.

Last year bus tours of the city's major rivers were piloted with each tour tracing one of the major rivers from the source to the sea. The prime objective of these trips was for participants to gain a greater awareness, appreciation and understanding of the different characteristics and values associated with each of these rivers.

Styx bus tours were held as part of the consultation process associated with asset management planning for this river, for general interest by the Burnside Probus Group, for Wharenui School as a class prize in Water Expo '99 and Council elderly housing residents. Bus tours of the Avon and Heathcote Rivers were held as part of the Heritage Week celebrations. Feedback on each bus trip has been excellent and there are currently waiting lists for people wanting to go on future bus trips for each of the rivers.

The Shirley/Papanui Community Board sponsored the bus trip for the Council elderly housing residents. Those people who were part of the Burnside Probus Group or went on the Avon and Heathcote Heritage trips paid.

These bus tours have since been evaluated. It was decided to continue with bus tours due to their popularity and success. Consideration, however, needs to be given to the physical fitness and commitment of those people who go on these tours. After the pilot trip for elderly Council residents it was felt to be more cost effective to educate the City Housing recreation officers about possible trips that they could take residents on as part of their work rather than the Water Services Unit organising the trips. Please refer to report 'Subsidised Styx River Bus Tours for elderly persons Housing Residents' by the Community Secretary, Barbara Lindsay.

A limited number of bus tours will be undertaken on a planned basis with each trip being kept small and special. One tour a month will be held over the six months of warmer weather, that is October to March inclusive. This would allow for two regular tours per year along each of Christchurch's major rivers. Additional to this, a maximum of one further tour each month would be held if specifically requested by an interested party (eg Probus, schools). This would allow for a total of twelve trips in any one year. Bus tours will be re-evaluated in twelve months' time.

The Water Services Unit will continue to charge participants for the cost of bus hire, organisation and morning or afternoon tea, typically amounting to a total of \$600 per tour. The Water Services Unit will cover the cost of expert advice and promotional material. Even though the subsidised bus trip with residents from the elderly persons housing was not completely successful, there is still an excellent opportunity for the Community Board to consider working in partnership with the Water Services Unit by subsidising bus trips for other community groups within its area.

**Recommendation:** That the Community Board give consideration to continue working in partnership with the Water Services Unit in providing bus tours of the city's major rivers for other community groups within its area.

**Chairperson's**

**Recommendation:** That the officer's recommendation be adopted.
