## 

 RMF

# 12 Month Report July 1999 to June 2000 

## TABLE OF CONTENTS

1. MANAGERS OVERVIEW ..... 2
2. FINANCIAL SUMMARY ..... 3
3. LIQUID WASTE PERFORMANCE INDICATORS ..... 18
4. SOLID WASTE PERFORMANCE INDICATORS ..... 20
5. CONTRACTS PERFORMANCE INDICATORS ..... 25
APPENDICES
6. CHRISTCHURCH WASTEWATER TREATMENT PLANT ANNUAL OPERATING STATISTICS ..... 26
7. REFUSE STATION AND LANDFILL STATISTICS ..... 28
8. TOTAL REFUSE TO LANDFILL ..... 29
9. RECYCLING TONNAGES: TRENDS ..... 30
10. COMPARISONS OF KERBSIDE RECYCLING TONNAGES ..... 31
11. COMPOST FACILITY BUSINESS PLAN PERFORMANCE MEASURES ..... 32
12. KEY STRATEGIES FROM 1998/99 COMPOST FACILITY BUSINESS PLAN ..... 33

## Waste Management Unit

## 1. MANAGERS OVERVIEW

Note that this report does not repeat outputs reported for the first five months of the year, ie from July to November 1999 - refer to the previous Five Month Report for these details.

Key outputs that the Unit has achieved over the past seven months were as follows.

## Liquid Waste:

- Trade Wastes Bylaw introduction process completed and Bylaw became operative on 1 July 2000.
- Cost share area introduced in Halswell to pay for new pipework and pumping infrastructure to service new development in the area.
- National wastewater benchmarking results to end of June 1999 reported with above average results.
- Trial for alternative UV Wastewater Sterilisation method approved by Council and trials started.
- Negotiations started with City Care to set up a sewer grouting operation.

## Solid Waste:

- Trailer weighing and sorting introduced at Refuse Stations.
- Domestic hazardous waste drop off points established at Refuse Stations.
- New refuse bags with tie handles introduced. Next batch require slightly bigger diameter to fit standard plastic bins.
- Publicity and education programme for new Regional Landfill and waste minimisation implemented through Canterbury Waste Sub-Committee. Also host support fund established to assist Territorial Local Authorities when new landfill site identified.
- Draft strategy for hazardous waste published by Hazardous Waste Working Party and ready for consideration by member Territorial Local Authorities.
- Target date for new Regional Landfill established by Transwaste Canterbury as mid 2004 enabling resource consent extension for Burwood (to mid 2006) to be lodged.
- New method of refuse bag via coupon mailout and redemption agreed to by Council.
- Community Gardens Project started including employment of contract facilitator.

## Financial:

- Surplus operational money of $\$ 1.220 \mathrm{~m}$ declared at 5 months and used to fund several other projects (trailer weighing, site purchase No 11 pumping station at Randolph Street, UV trials, asbestos removal CWTP, Mecca Place site purchase).
- Achieved additional surplus operational money for last 7 months of $\$ 0.682 \mathrm{~m}$.
- Achieved cost neutral capital result after implementation of carryovers.

## Management:

- Significant staff time input for servicing Orion Review and looking at associated internal restructuring possibilities aimed at reducing costs.

## FINANCIAL SUMMARY

## Business Unit: Waste Management <br> Financial Result July to June 1999/00

| Output Class <br> Operational | $\begin{gathered} \hline \text { 1998/99 } \\ \text { July-June } \\ \text { Net Cost } \end{gathered}$ | $\begin{gathered} \hline \text { 1999/00 } \\ \text { July- June } \\ \text { Expenditure } \end{gathered}$ |  | 1999/00July- JuneExternal Recoveries |  | $\begin{gathered} \text { 1999/00 } \\ \text { July-June } \\ \text { Net Cost } \end{gathered}$ |  | $\begin{gathered} \hline \text { 1999/00 } \\ \text { Variance } \end{gathered}$ | Note |

SOLID WASTE CAPITAL BUDGET 1999/2000

## 2. FINANCIAL SUMMARY

- Notes
- To explain variances from budget are shown below
- For note (a) read "This does not effect the financial bottom line. It results from a redistribution of staff time to outputs that differ from those anticipated at the time the budget was prepared.
- For note (b) read "Amount within reasonable margin of error and of negligible overall significance."

## LIQUID WASTE

1. Reticulation
\$254,127 Underbudget
Explanation:
Additional recoveries $(\$ 46,435)$, staff time $(\$ 228,716$ under, see note below) additional depreciation $(\$ 278,060)$, purchase of water ( $\$ 50,021$ under), sewer repairs ( $\$ 57,350$ under), CCTV inspection ( $\$ 55,697$ under) and lateral repairs ( $\$ 51,881$ over), trench settlement correction ( $\$ 25,000$ under), Sewer Maintenance Contract ( $\$ 101,756$ under) and Stormwater inflow removal (\$16,893 under).

Note: This mainly results from a change of focus once Geodata Services were set up with a move away from electronic conversion so much less time than budgeted spent on Liquid Waste Plan conversion.

## 2. Pumping

\$207,792 Underbudget
Explanation:
Note: That this will come to account in 2000/01 as an unbudgeted sum in that year.
3. Trade Waste Services
\$63,594 Overbudget
Explanation:
See note (a)
4. Laboratory Services
\$103,334 Overbudget
Explanation:
See note (a)

## 5. Christchurch Treatment Works Operations \& Maintenance <br> \$639,569 Underbudget <br> Explanation: <br> Staff time ( $\$ 460,177$ under, see note below), site and grounds (\$20,346 over), pond maintenance ( $\$ 11,238$ over), midge control ( $\$ 18,066$ under), influent structure and screens ( $\$ 29,040$ under), disposal of screenings and grit ( $\$ 28,043$ under), trickling filters ( $\$ 16,248$ under), secondary sedimentation tanks ( $\$ 21,521$ over), new clarifiers ( $\$ 20,000$ under), sundry mechanical maintenance ( $\$ 47,996$ over), operations ( $\$ 143,360$ over), additional Trade Wastes revenue ( $\$ 134,155$ ), imported power ( $\$ 79,201$ under), Waukesha Engine ( $\$ 45,978$ over), additional revenue from sale of energy ( $\$ 64,346$ ), and biosolids dewatering ( $\$ 85,218$ under).

Note: With the set up of SAP some staff time was not charged out correctly to the outputs (refer Laboratory services $\$ 103,334$ over, Trade Wastes services $\$ 63,594$ over). These resulted in under charging to the CWTP Operations and Maintenance. Further, staff time was budgeted into this operational code but charged (correctly) against some capital works when staff have been working on these capital projects e.g. CWTP upgrade.

## 6. Biosolids Application \& Use <br> \$61,699 Underbudget <br> Explanation: <br> Forest application not yet commenced.

## 7. Farm Operations \& Maintenance <br> \$54,986 Underbudget <br> Explanation: <br> Better cattle sale numbers and margins than budgeted.

## 8. Belfast Treatment Plant Operations \& Maintenance <br> \$1,116 Underbudget <br> Explanation: <br> See note (b)

9. Templeton Treatment Plant Operations \& Maintenance
$\$ 23,979$ Underbudget
Explanation:
Pond emptying not commenced $(\$ 10,000$ under $)$, Pond Maintenance ( $\$ 13,077$ under).
10. Resource Consents
\$103,499 Underbudget
Explanation:
See note (a)
11. Bylaws
\$31,580 Overbudget
Explanation:
See note (a)

## 12. PIMS/LIMS

\$39,730 Underbudget
Explanation:
See note (a)

## 13. City Plans

\$2,901 Underbudget
Explanation:
See note (b)
14. Regional Policy
\$10,945 Underbudget
No work required

## 15. Regional Plans <br> \$1,256 Underbudget <br> Explanation: <br> See Note (b)

## 16. Advance Planning

\$39,657 Overbudget
Explanation:
See note (a)
17. GIS Information
\$23,303 Underbudget
Explanation:
See note (a)
18. Information Requests
\$50,051 Overbudget
Explanation:
See note (a)
19. CWTP Capacity Upgrade
\$168,670 Underbudget
Explanation:
Greater than expected development following City Plan release, resulting in the increased revenue.
20. Total Liquid Waste
\$1,306,356 Underbudget
Explanation:
Mainly items $1,2 \& 5$.

## SOLID WASTE

21. Commercial Waste Reduction<br>\$49,106 Overbudget<br>Explanation:<br>$\$ 50,000$ unbudgeted expenditure on funding the Redesigning Resources Conference

22. Resource Reuse Centres<br>\$21,018 Underbudget<br>Explanation:<br>Parkhouse Road Resource Reuse Centre (\$11,394), Metro Place \$4,637), Styx Mill (\$4,987).<br>See Note (a)

## 23. RMF Operations

\$8,913 Underbudget
Explanation:
This item includes the waste minimisation revenue which a was slightly over the forecast amount

## 24. Kerbside Recycling <br> \$143,409 Overbudget <br> Explanation:

Additional payment to collection contractor for additional tonnage ( $\$ 100,000$ ) and higher than forecast CPI adjustment due to fuel price hikes $(\$ 40,000)$.

## 25. Information \& Publicity

\$9,722 Underbudget
Explanation:
See note (a)

## 26. City Compost Facilities <br> \$98,439 Overbudget <br> Explanation: <br> Target revenues for both green waste $(\$ 26,000)$ and external compost sales $(\$ 68,000)$ not reached.

## 27. Domestic Compost <br> \$6,371 Underbudget <br> Explanation: <br> See note (b).

## 28. Domestic Collection

\$145,675 Overbudget
Explanation:
Considerable over expenditure on refuse bag purchase $(\$ 121,000)$ due to fuel price increases. $\$ 36,000$ over due to domestic refuse collection tonnage higher than predicted, but offset by small savings in other areas.

## 29. Excess Domestic Collection

\$44,766 Overbudget
Explanation:
Additional revenue already removed from this item at $5 \& 9$ month report but final bag sales figure less than predicted at 9 month report.

## 30. Inner City Collection

\$14,960 Overbudget
Explanation:
Additional revenue already removed from this item at $5 \& 9$ month report but final bag sales figure less than predicted at 9 month report.
31. Parkhouse Road Refuse Station
\$131,965 Underbudget
Explanation:
Tonnage, and therefore revenue higher than budgeted.
32. Metro Place Refuse Station
$\$ 41,189$ Underbudget
Explanation:
Tonnage, and therefore revenue higher than budgeted.
33. Styx Mill Refuse Station
\$31,412 Underbudget
Explanation:
Tonnage, and therefore revenue higher than budgeted.

## 34. Burwood Landfill

\$25,170 Overbudget
Explanation:
Considerable additional revenue already removed from this item at 5 and 9 month review. Overall operational expenditure was $\$ 90,000$ less than budget. The $\$ 25,170$ represents a slight overestimation of expected revenue in the last quarter.
35. Landfill Aftercare\$70,258 Underbudget
Explanation:Progress slower than expected, plus work done to date has shown much less remedial work isrequired.
36. Hazardous Waste Disposal
\$25,614 Underbudget
Explanation:
Laboratory services, and Trade Waste services budgeted for but not fully used due to these costs now falling more to where they should, eg companies going direct to private hazardous waste treatment facilities.
37. Future Landfill Investigations
\$406,903 Overbudget
Explanation:Professional fees disallowed as capital costs, so moved to operational where budget waslimited. (\$106,000). Capital expenditure incurred in 1996/1997 and 1998/1999 on thisproject unable to be capitalised as no new asset has yet been created until Regional Landfillsite is finally confirmed. Capital costs moved to operational costs in 1999/00 (\$300,000).
38. Waste Management Plan
\$35,230 Overbudget
Explanation:
See note (a)
39. City Plan\$2,204 Underbudget
Explanation:
See note (a)
40. Regional Plan
\$8,818 Overbudget
Explanation:
See note (a)
41. Total Solid Waste
\$623,400 Overbudget
Explanation:
Mainly items $24,28 \& 37$.
42. Total Waste Management Unit
\$681,956 Underbudget
Explanation:
Sum of items $1 \& 41$.

## CAPITAL

## Liquid Waste <br> Renewal and Replacement

## 43. Infrastructural <br> \$127,891 Underbudget <br> Explanation:

There were 36 sewer renewal projects of which 15 were underspent, 14 were overspent and money carried forward in six of the projects. Main overspend was Bass Street, No 20 pressure main emergency repair $(\$ 80,944)$, and main underspends were in project management ( $\$ 182,973$ ), design costs $(\$ 84,270)$, and St Martins Road sewer renewal $(\$ 47,742)$.

## 44. Fixed Assets <br> \$64,173 Underbudget <br> Explanation:

Pumping station control system ( $\$ 22,348$ under), Photocopier not purchased now leased ( $\$ 14,000$ ), flow measurement at Parshal Flumes ( $\$ 7,070$ under), and digitiser not purchased $(\$ 16,000)$.

## Asset Improvements

## 45. Infrastructural

\$461,064 Overbudget
Explanation:
Belfast Plant upgrade (\$57,754 over), Screen installation (\$55,191 over), Consent (\$24,907 over), CWTP upgrade ( $\$ 192,284$ over ie; staff time budgeted in operations area), pumping station upgrades ( $\$ 24,626$ over), Pumping Station 15 variable speed drive ( $\$ 15,133$ over), lifelines overflows (\$10,570 over).

## 46. Fixed Assets

Nil spent
Explanation:
Nil budgeted.

## New Assets

## 47. Infrastructural

\$133,319 Underbudget
Explanation:
Subdivision sewer cost share ( $\$ 44,717$ under), Quaifes Road sewer ( $\$ 23,210$ under), Johns $\operatorname{Road}(\$ 52,913$ under), reticulation odour control ( $\$ 29,660$ under).

## 48. Fixed Assets

\$98 Overbudget
Explanation:
See note (b)

## 49. Subtotal Capital Liquid Waste

\$135,779 Overbudget
Explanation:
Sum of items 43 to 48.

## Solid Waste

## Renewal and Replacement

## 51. Fixed Assets

On budget

## Asset Improvements

53. Fixed Assets -
\$32,764 Overbudget
Explanation:
Slight cost overrun on trailer weighing project.

## New Assets

## 55. Fixed Assets -

\$5,640 Underbudget
Explanation:
See note (b)

## 56. Subtotal Capital Solid Waste <br> \$27,124 Overbudget <br> Explanation <br> Sum of items 51 to 55 .

## Business Section

## 57 Fixed Assets-Renewal \& Replacements \$111,724 Underbudget <br> Explanation: <br> This code was established to amalgamate the Units requirements for all new computers, and various items of equipment and furniture up to individual values of $\$ 5,000$. With the change in Council policy to leasing computers and other equipment the provisions covered under this code were not required as follows:

- 6 replacement computers at $\$ 3,500$ each $\$ 21,000$
- 3 replacement computers at $\$ 13,000$ each (Utility Mapping) $\$ 39,000$
- GIS software not proceeded with for Untility Mapping as the section was reformed into GeoData Services
\$50,000
Total
\$110,000

## 58. Assets - Asset Improvements

\$24,890 Underbudget
Explanation:
This code was established to amalgamate the Units requirements for individual improvements to assets up to a value of $\$ 10,000$. Significant purchases/costs not proceeded with were:

- Upgrade of CWTP software charged to renewals and replacements $\$ 6,000$
- Upgrade of TRIM software not required as originally planned $\$ 1,000$
- Calibration costs for upgrade of Trade Wastes equipment costing less than original estimate
\$10,000
Total \$17,000
59 Fixed Assets - New Assets
$\$ 25,849$ Underbudget
Explanation:
This code was established to amalgamate the Units requirements for New
This code is underspent because with the restructure of Utility Mapping
GeoData Unit the following were not proceeded with during the year.
- Purchase of CD writer
- Establishment of new storage area

60. Subtotal Capital Business Section
\$162,463 Underbudget
Explanation:
Sum of items 57to 59.
61. Total Capital
\$440 Overbudget
Explanation:
Sum of items 43 to 60 .
62. Sale of Furniture and Chattels

Nil
63. Sale of Land

Nil
64. Total Revenue From Sales

Nil
65. Total Waste Management Unit
\$681,516 Underbudget
Explanation:
Sum of items 1 to 64.

## Operations

- Liquid Waste was $\$ 1.306 \mathrm{~m}$ underbudget (compare with $\$ 0.930 \mathrm{~m}$ underbudget at 5 months most of which redistributed). Main contributing items were reticulation, pumping and Christchurch Wastewater Treatment Plant.
- Solid Waste was $\$ 0.623 \mathrm{~m}$ overbudget (compare with $\$ 0.618$ underbudget at 5 months most of which redistributed). Main contributing items were Kerbside Recycling, Domestic Collection, and Regional Landfill Investigations.
- Net Liquid and Solid Waste was $\$ 0.683 \mathrm{~m}$ underbudget.

It is to be noted that on top of this underspend the Unit distributed a further surplus of $\$ 1.220 \mathrm{~m}$ to other projects at the end of 5 months.

## Capital

- Liquid Waste was $\$ 0.136 \mathrm{~m}$ overbudget with $\$ 4.511 \mathrm{~m}$ carryforwards (principally CWTP AEE 0.412 , Clarifiers 1.324 , aeration 1.150 etc).
- Solid Waste was $\$ 0.027 \mathrm{~m}$ ) overbudget with $\$ 0.919 \mathrm{~m}$ carryforwards (principally Regional Landfill 0.239, RMF 0.408, Burwood Landfill 0.124 etc).
- Business Section was $\$ 0.162 \mathrm{~m}$ underbudget due mainly to savings in the move to leased computers.

Overall the 12 month financial result for the Unit was very satisfactory. The large carryforwards for clarifier and aeration elements of the CWTP upgrade will result in a later completion of work but this will have little significance in the operation of the plant.

## 3. LIQUID WASTE PERFORMANCE INDICATORS

(a) Reticulation, Pumping, Sanitation, Trade Waste Services, Laboratory Services

| Performance Indicators |  |
| :--- | :--- |
| 1. | Liquid Waste Management Plan completed and special <br> consultative procedure completed. (1998/99: Draft <br> completed. |
| 2. $\quad$Full implementation of 1999/00 sewer renewal capital <br> works programme and the Asset Management Plan. <br> (1998/99: All programmed contracts let. 20 out of 25 <br> contracts completed, 5 carried forward.) |  |
| 3. $\quad$Commencement of new inflow and infiltration <br> remedial works as recommended in the AWT Sewer <br> Strategy report, plus inspection and remedial works on <br> a further 15,000 properties. (1998/99: A further <br> 13,830 properties inspected in Richmond Shirley area. <br> Now inspected 70\% of the properties. |  |

4. Record and report all overflows of sewage with a target of no overflows resulting from failure of Council pumping equipment. (1998/99: No overflows due to failure of pumping equipment.)
5. Record changes in numbers of industries paying Trade Wastes quarterly charges with a target of 10 new industries. (1998/99: 13 new industries on quarterly charges with 3 industry closures, net change of 10 .)
6. Comment on $90 \%$ of Resource and Building Consents within two days. (1998/99: Comment made on 726 PIMs and 524 Building Consents all within target times.)
7. Record number of responses to incidents and response time against a target of $98 \%$ responses within 15 minutes. (1998/99: All 145 incidents responded to within 15 minutes [cost recovery achieved for 27 responses])

## Results Achieved

Consultation on hold until Christchurch Wastewater Treatment Plant Discharge Consent application lodged.)

All programmed contracts let. 14 out of 16 contracts completed, 2 carried forward. 2 extra contracts let above original programme.

Negotiating with City Care to carry out grouting programme. Draft AWT Stage II report completed. A further 18,614 buildings inspected in the Central City, Wainoni, Ferrymead and Burwood areas. (Now inspected $85 \%$ of City properties.)

No overflows due to failure of pumping equipment. One overflow due to major pipeline failure.

Trunk system flow monitoring completed. Flow model development progressing.)

Six new industries on quarterly charges with six industry closures, net change of NIL.

Comment made on 550 Building Consents and 661 PIM's all within target times.

All 152 incidents responded to within 15 minutes (cost recovery achieved for 57 responses).

## (b) Pages Road, Belfast, Templeton Treatment Works

## Performance Indicators

1. Resource consents for odour and effluent discharge applied for by 30 June 2000.
2. Maximise engine generator use with average 8,000 hours on-load operation over the two National Engines and the Waukesha Generating set.
3. (a) Measure discharge pollutant levels with a target of an average of $70 \%$ and $65 \%$ reduction in BOD and suspended solids through the Christchurch Wastewater Treatment Plant.
(b) Measure discharge faecal coliform levels with a target of an average $99.7 \%$ reduction in faecal coliforms throughout the Christchurch Wastewater Treatment Plant and oxidation ponds with final effluent average less than $10,000 / 100 \mathrm{ml}$.
4. Measure wastewater treatment costs against the target of $\$ 10.60$ (target should have been $\$ 16.67$ ) per person per year maximum, $\$ 28.00$ (target should have been $\$ 44.19$ ) per ratepayer and $\$ 0.07 / \mathrm{m}^{3}$ (target should have been $\$ 0.11$ ) per year.

## Results Achieved

Consent applications delayed pending further examination of issues. Probable application date now March 2001.
Average on load operation 7914 hours, $(8,281$ 8000, 7461 hours). Major maintenance required on Waukesha vibration damper.
(a) Achieved 65\% BOD and 59\% Suspended Solids reduction through the plant. Low result due to impact of upgrade works in progress.
(b) Achieved $99.86 \%$ faecal coliform removal and a final effluent average $8,200 / 100 \mathrm{ml}$.

Wastewater Treatment actual costs were \$13.14 person (target < \$16.67), $\$ 34.82$ per ratepayer (target < \$44.19) and $\$ 0.08$ per m $^{3}$ (target < $\$ 0.11 / \mathrm{m}^{3}$ ).
(c) Resource Consents, Bylaws, PIMs/LIMs, City Planning, Regional Planning, Advanced Planning, GIS Information, Information Requests

## Performance Indicators

1. Performance will be assessed by Water Services who do this task on behalf of the Waste Management Unit. Target LIMs 90\% processed within four days, PIMs $90 \%$ within two days.
2. Achieve $50 \%$ of conversion of Liquid Waste Plan Records into electronic form by 30 June 2000.
3. To have loaded $30 \%$ of CCTV tape information into PAMS condition rating module by 30 June 2000.
4. To respond to $90 \%$ of all customer complaints within one working day and to record complaints for odour, against a target maximum of one per 1,000 customers

## Results Achieved

Water Services achieved 83\% of 260 PIMs within two working days and $92 \%$ within three days. Drainage plans for a further 2,614 PIMs were processed. Achieved $93 \%$ of 10,215 LIMs processed within four days.
$40 \%$ of data available electronically by 30 June 2000. Efficiency review determined to scan all data, so that all information available on line as soon as possible.

All CCTV data prepared and ready for loading. Final software checking required before loading can be completed.

38 complaints received, ie., 0.3 per thousand customers.

## 4. SOLID WASTE PERFORMANCE INDICATORS

## (a) Commercial Waste Reduction

## Performance Indicators

1. Development of the Target Zero Regional Network according to the project programme. Case studies/info on waste reduction initiatives distributed on at least six occasions through Target Zero Regional Network member's existing networks.
2. Response levels measured as part of existing business association readership survey.
3. Three demonstration programmes completed and initial results/case studies documented.
4. Implementation of improvements to Christchurch City Council infrastructure (eg fees charging regimes, inter unit liaison and co-operation measured by survey of businesses).
5. $10 \%$ of businesses implement changes as a result of targeted information distributed to 1,000 Christchurch businesses as measured by a telephone survey (cf $4 \%$ of 3,000 businesses in 1997/98).
6. Documentation of implemented waste reduction initiatives within WMU.

## Results Achieved

- Target Zero Programme Manager commenced February 2000
- Working with wide range of consultants to develop action plan
- Information distributed through Target Zero newsletters (3), Christchurch Star (2 articles), Christchurch Press (half page feature), wall planner (1000), Canterbury Business Monthly.
- Seminars for printers, foundries (CMA), CECOC members
- Research funding used to investigate:
- Residents attitudes to waste minimisation
- Effectiveness of teams in implementing cleaner production
- Results received of survey into uptake of cleaner production/environmental management in original Target Zero programme.
- Two Target Zero programmes completed, third to finish November 2000
- Case studies documented
- Green Retail 'Measure to Manage' programme commenced.
- Delayed pending restructure finalisation.
- Recycling information and poster distributed to 2,000 central city businesses. Survey showed no business used the information and poster. This resulted in a change of approach, Waste Minimisation information distributed on request, and work with sectors (printers, foundries) on specific problems.
- Focus on establishing internal process for establishing Sustainable Christchurch.

## (b) Resource Reuse Centres

| Performance Indicators | Results Achieved |
| :--- | :--- |
| $1 . \quad$ New initiatives identified and implemented. | Trailer sorting and weighing project completed and <br> in operation. |

(c) Recycling (Including Kerbside)

| Performance Indicators | Results Achieved |  |
| :--- | :--- | :--- |
| 1. | The level of public satisfaction with Kerbside <br> Recycling services provided, as measured by the <br> annual citizens survey, with a target of $90 \%$ of <br> residents satisfied. | The 2000 survey resulted in $89 \%$ of respondents <br> thinking the service was very good or good, or no <br> feeling either way. |

2. Delivery of sorted newspaper, glass, plastic and metal cans to the Recovered Materials Foundation with a maximum of 12 complaints per year from the Recovered Materials Foundation about contamination.
3. Liaison meetings held between Waste Management Unit and Onyx staff at least fortnightly with improvements identified and implemented.
4. Raised level of public awareness of the Waste Minimisation hierarchy and the need for clean sorted recyclable material as measured in the annual citizens' survey.
5. Improved paper waste and putrescibles investigation completed, results reported to City Services.
6. Liaison meetings held between Waste Management Unit and RMF staff fortnightly with improvements made to existing recycling methods and at least two new initiatives started.

## Recovered Materials Foundation Performance Indicators

7. $90 \%$ of input tonnage marketed or stockpiled on site for a specific purpose.
8. Sales and income of products ventured into new markets.
9. Number of successful contacts made through Waste Exchange service.
10. Comparison between income from value added products this year to last year

One formal complaint from the Recovered Materials Foundation.

Fortnightly meetings held

- No further improvements identified since 6 month report.

Independent survey commissioned by Waste Management Unit has shown that understanding of waste issues is still not high.

Proposed to start additional paper collection February 2000. Putrescibles collection investigation delayed but community gardens work in progress.

Regular meetings held.

- No additional improvements identified since 6 month report.

## Results Achieved

All materials recovered at kerbside and delivered to site that met specifications were processed for recycling markets. The exception being non complying materials and wet newspaper.

|  | (\$) 99/00 | (\$) $\mathbf{9 8 / 9 9}$ |
| :--- | ---: | ---: |
| Crushed glass | 87,413 | 106,800 |

| Total |  |  |

## (d) Composting

## Performance Indicators

1. Performance will be assessed by measuring and reporting:
(a) Tonnage increase.
(b) Techniques have been identified and developed and field trials results recorded.
(c) New sources have been identified and implemented
(d) Sales revenue targets have been achieved.
(e) Measurement by annual citizens survey.
(f) Field trial results recorded.
2. Relationship established with potential invessel composting partners and proposals reported to the Council.
3. New sources of compostables identified, trials completed and Resource Consent extension applied for if applicable.

## Results Achieved

See Appendix 2 where Business Plan performance indicators are reported separately.

Hazaka negotiations ended and new feasibility report on startup invessel plant commissioned for reporting to City Services in October 2000.

Progress on this was withheld pending outcome of Hazaka negotiations.

## (e) Collection Operations

## Performance Indicators

1. The level of public satisfaction with the refuse collection service as measured by the annual survey of residents with a target of $90 \%$ of residents satisfied.
2. Liaison meetings held between Waste Management Unit and Onyx staff at least fortnightly with improvements identified and implemented.
3. Options considered for moving towards "user pays", programme formulated and approved by City Services Committee and the Council. Implementation of programme commenced.

## Results Achieved

Survey results show that $86 \%$ think the service is very good, good or have no feeling either way.

Meetings held fortnightly. No new improvements identified since 6 month report.

Progress on this deferred.

## (f) Transfer Operations

| Performance Indicators |  |  |
| :--- | :--- | :---: |
| $1 . \quad$Reduction in operating costs of at least 5\% due to the <br> operation of the new service level agreements. |  |  |

2. The number of unplanned shutdowns of refuse stations as a result of plant failure or non-compliance with consents or conditions with a target of none.
3. Report to the Council on proposals for differential charging.
4. Meeting specific Environmental Management System targets.
5. Payment by weight for trailers introduced.

## Results Achieved

Negotiations delayed due to formation of City Care as a LATE, but negotiations now recommenced and contract expected to be reported to City Services in November.

No shutdowns from causes noted, but shutdowns have occurred from hazardous materials being dumped in the pit.

No substantive progress made on this project.

The Environmental Management System at Parkhouse has proved cumbersome. The roll out to other stations is to be achieved by incorporation in the contract with City Care.

System introduced in April.

## (g) Disposal

| Performance Indicators |
| :--- | :--- |
| $1 . \quad$Operation of the Burwood Landfill in accordance <br> with the Management Strategy, Consents and <br> Bylaws. |
| $2 . \quad$Completion and implementation of a Management <br> Strategy for closed landfills, and compliance with <br> all consents, with a target of zero violations. |

3. Implementation of strategies for dealing with commercial and household special and hazardous wastes, and the continuation of an expanded Regional Hazardous Waste Advisory Service.

## Results Achieved

- No complaints from Environment Canterbury.
- A few local odour complaints received and action taken promptly to resolve.
- Consent monitoring programme and reports have met Environment Canterbury conditions.
- Difficulties experienced with Environment Canterbury in obtaining consents. Management plan target delayed. Completion expected by December 2000.
- Domestic hazardous waste now accepted at Refuse Stations
- Regional Hazardous Waste Reduction Co-ordinator making good progress as reported to City Services in July.

## (h) Advanced Planning

## Performance Indicators

1. Progress towards targets in the Waste Management Plan including waste composition analysis, reported annually to the Council.
2. Reporting on City and Regional Waste Management Issues as required.
3. Site identified and Resource Consent application lodged for a new Regional Landfill.

## Results Achieved

- Waste reduction performance detailed in Appendix 2.
- Waste audit completed May 2000. Will be reported formally to City Services in October 2000.
- No City Plan issues needed reporting
- "No Time to Waste" Regional Waste Educational programme half complete. (Remainder programmed for 00/01 year).
- Regional Hazardous Waste Management Plan developed in partnership between Canterbury Waste Subcommittee and Environment Canterbury. Will be considered by City Services for possible approval by this Council August/September 2000.

Site identified but programme extended as reported to City Services in July.

## (i) Other Key Solid Waste Management Statistics and Information

Refer to Appendices.

## 5. CONTRACTS PERFORMANCE INDICATORS

| Performance Indicators | Results Achieved |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 1. Number and value of contracts supervised and recorded in various categories of work. |  |  |  |  |
| Sewer Reticulation | Number | 26 | Value | \$1,440,360 |
| Treatment Works | Number | 3 | Value | \$5,103,400 |
| Stormwater Reticulation | Number | 16 | Value | \$341,352 |
| Rivers and Tributary Waterways and work for other Units | Number | 25 | Value | \$1,083,678 |
| Total | Number | 70 | Value | \$7,968,790 |
| 2. Number of Roading related stormwater projects supervised and recorded. | Number | 6 |  |  |
| 3. Number of Subdivisions supervised and recorded. | Number | 8 |  |  |

## Christchurch Wastewater Treatment Plant Annual Operating Statistics <br> from $1 / 07 / 99$ to $30 / 6 / 2000$

CHRISTCHURCH TREATMENT WORKS OVERALL YEARLY PLANT OPERATIONS SUMMARY

| POPULATION AND FLOWS | 90/91 | 91/92 | 92/93 | 93/94 | 94/95 | 95/96 | 96/97 | 97/98 | 98/99 | 99/00 |

## Comparisons of Kerbside Recycling Tonnages

## Compost Facility Business Plan Performance Measures

## From 1 July 1999 to 30 June 2000

Key Performance Measures from 1998/99 Business Plan

| Performance Indicator | Target | Results Achieved |  |
| :--- | ---: | ---: | ---: |
|  | $\mathbf{1 9 9 9} / \mathbf{0 0}$ <br> July - June | $\mathbf{1 9 9 9 / 0 0}$ <br> July - June | 1998/99 <br> July - June |
| Greenwaste In (tonnes) | 30,000 | 34,393 | 31,535 |
| Soil Conditioner Produced $\left(\mathrm{M}^{3}\right)$ | 18,750 | 23,395 | 17,000 |
| Mulch Produced $\left(\mathrm{M}^{3}\right)$ | 6,000 | 7,165 | 7,000 |
| Gross Sales Revenue <br> (internal and external) | $\mathbf{6 7 8 , 0 0 0}$ | $\mathbf{7 0 7 , 3 7 9}$ | $\mathbf{5 6 1 , 7 8 8}$ |

Note: These performance measures are from the Compost Facility 1998/99 Business Plan, except the Gross Sales Revenue which comes from the 1999/00 budget.

## Comments

## Greenwaste Tonnes

The continued growth in green waste has been excellent although it is stretching the capabilities of the plant to process the volume. Note that even though green waste volumes are well over target, green waste revenue did not reach target. This is due to (i) an increasing percentage of commercial green waste being received (for which we get a lower $\$ /$ tonne) and (ii) heavier private loads of green waste for which we get only the fixed fee per load.

## Soil Conditioner Produced

The amount of soil conditioner produced reflects the increased tonnage of green waste processed. Included in the figure is un-screened partly composted material which was sold for use in rehabilitating Burwood and Sawyers Arms Road Landfill sites. Selling partly composted material helped overcome space problems at the plant and minimised operational cost by reducing turning and screening.

## Mulch Produced

Mulch quantities were lower than might have been expected with the increased tonnage of green waste. This was due to selling un-screened material for landfill rehabilitation.

## Gross Sales

The growth in sales has again been positive with a $24 \%$ increase in gross external sales when compared to last year.

# Key Strategies from 1998/99 Compost Facility Business Plan 

| Key Strategy | Results Achieved |
| :---: | :---: |
| 1. Increase greenwaste intake by: Target of 30,000 tonnes for year. | Target exceeded by 15\% |
| 2. Maintain yield of plant at targets $\left(\mathrm{m}^{3}\right.$ of product per tonne of green waste) <br> - Soil conditioner <br> - Mulch | - $0.68 \mathrm{~m}^{3} /$ tonne green waste (target $0.62 \mathrm{~m}^{3} /$ tonne) <br> - $0.21 \mathrm{~m}^{3} /$ tonne green waste (target $0.20 \mathrm{~m}^{3} /$ tonne) |
| 3. Research alternative shredder that would increase yield. | - Trials using a Willibald hammer-mill carried out with inconclusive results. <br> - Other trials deferred until decision on in-vessel plant made. |
| 4. Continue to explore options for Invessel composting. | Investigations into possible Hazaka Plant carried out. |
| 5. Increase Living Earth Sales: | Sales value of Living earth products increased by $74 \%$. |
| 6. For both Envy and Living Earth products, review sales at not more than monthly intervals and take corrective action as required. | Monthly meeting to review sales and marketing issues held. |
| 7. Regularly review Quality Assurance Manual. <br> 8. Regularly review Health and Safety Plan. | Reviews carried out. Reviews carried out. |

## Summary Data Compost Facility

| Item | 1998/99 | 1999/2000 |
| :---: | :---: | :---: |
| 1. Net Production Cost <br> Raw Compost production cost minus tipping fees | \$778,620 | \$740,039 |
| 2. Net Sales Revenue <br> Total sales revenue minus cost of sales | \$36,945 | \$98,645 |
| 3. Net Cost of Compost Plant Envy and Living Earth | \$741,675 | \$641,394 |
