

25. PROPOSED NEW RIGHT OF WAY NAME

Officer responsible Environmental Services Manager	Author Bob Pritchard
Corporate Plan Output: Subdivisions	

The purpose of this report is to obtain the approval of the Board to one right of way name.

Both names have been checked for similarity with existing names.

FER/20001440 GR & GA Hides 265 Mt Pleasant Road

The name Aspiring Lane was approved for this right of way by the Board in July this year. There was apparently a lack of communication between the applicant and his consultant. Mr Hides, the applicant, is not happy with the name Aspiring, and has requested that the Board consider two alternative names for which he has provided background. His first preference is CRAIGIEBURN LANE. The Hides family has had fifty-two years of association with ski-ing in the Craigieburn Range. Mr Hides was a foundation member of the Craigieburn Valley Ski Club and originally suggested the name for the Ski Club. The Hides family have been represented on the executive of the club, from its formation to the present. (Mr Hides believes the name is Gaelic for "Hillside above the stream"). The second preference is LONGITUDE LANE. The Hides family is related to John Harrison who solved the problem of determining Longitude in 1720, and the right of way will run from South to magnetic North.

Recommendation: That the Board approve the name Craigieburn Lane for this right of way.

**Chairman's
Recommendation:** For discussion
