

5. WINCHESTER STREET - KERB AND CHANNEL RENEWAL

Officer responsible City Streets Manager	Author Brian Boddy, Area Engineer Fendalton, DDI 372-2724
Corporate Plan Output: 2001/2002 Capital Works Programme	

The purpose of this report is to request that the Board approve the **separately circulated** publicity plan for the renewal of the kerb and channel in Winchester Street between Rugby Street and Andover Street for distribution.

BACKGROUND

Winchester Street is on the capital works programme to have its kerb and dish channel renewed from Rugby to Andover Streets on the eastern side in the 2001/2002 financial year. Overhead services in this section of the road shall be undergrounded before construction work is started as budgeted for by the Environmental Policy and Planning Unit.

The residents have been surveyed and their feedback has been incorporated in the design, except for speed humps (requested by 11 with 3 against) which are not recommended for this section of the street because it is a bus route.

An amount of \$120,000 has been budgeted for the work and the estimated cost of this proposal is \$98,000.

Recommendation: That the publicity plan showing the location of the proposed kerb and channel and associated works in Winchester Street be distributed for public comment.

Chairman's

Recommendation: That the foregoing recommendation be adopted.
