

17. VICTORIA STREET P5 LOADING ZONE

Officer responsible City Streets Manager	Author Peter Atkinson, DDI 371 1662
--	---

The purpose of this report is to seek approval to create a P5 loading zone on the north-eastern side of Victoria Street between Peterborough Street and Salisbury Street.

A number of new developments have occurred in Victoria Street resulting in the removal of two vehicle entrances. This has created two additional parking spaces. Following a request from one of the new business, it is proposed to create a short loading zone to service these new premises. The loading zone which will occupy one parking space is proposed to be located at the end of the existing part time taxi stand in an area which is P60 metered parking area.

The proposed loading zone is supported by the adjacent property occupiers and the Parking Operations Manager.

- Recommendation:**
1. That a loading zone with a time limit of 5 minutes be created on the north eastern side of Victoria Street commencing at a point 47 metres measured in a north westerly direction from a point opposite the northern kerblines of Peterborough Street and extending in a north westerly direction for a distance of 7 metres.
 2. That the existing P60 metered parking space in the above described area be revoked.

Chairman's Recommendation: That the above recommendation be adopted.
