

6. "OUR WATER IN THE BALANCE"

Officer responsible Infrastructure & Facilities Policy Manager	Author Warren Brixton, DDI 371-1439
Corporate Plan Output: Regional District Plans and Policies	

Environment Canterbury have recently issued a draft discussion document entitled, "Our Water in the Balance".

The document raises a number of issues and options and invites comment to these. In its final form, it will contribute to the preparation of the Natural Resources Regional Plan.

The matter was also the subject of a joint City Services, Parks and Recreation and Environment Committees' seminar. Following this, the Council's proposed submission is attached.

Some of the issues raised have implications relating to the City Plan, therefore the draft submissions are being referred to the Resource Management Committee.

Chairman's Recommendation: For discussion.
