

21. **HOLMWOOD ROAD- SOUTH SIDE KERB AND CHANNEL RENEWAL**

Officer responsible City Streets Manager	Author Brian Boddy, Area Engineer Fendalton, DDI 372-2724
--	---

The purpose of this report is to request that City Services Committee approve the proposed kerb and channel renewal in Holmwood Road for construction.

Over 200 publicity leaflets were distributed in the area of and including the full length of Holmwood Road. Responses from 34 properties were received, six unconditionally supported the plan, 13 supported the basic proposal but with requests for extra works, and 15 were against the proposal. The majority of those objecting to the proposal would accept the proposal if the angle parking and narrowing of Holmwood Road were removed (see attached plan). The preferred street tree by the majority of respondees is the Magnolia Kobus.

It was recommended by the Fendalton/Waimairi Community Board at its meeting on 4 September 2001 that the work be approved to go ahead as shown on the revised attached plan TP129601 amended following the Board meeting.

It is proposed that construction plans for the work be drawn and the work tendered. The budgeted amount for the work is \$226,000.

Recommendation: That the work be approved for construction as shown on the attached plan amended on 26/7/01.

Chairman's Recommendation: That the above recommendation be adopted.
