

## 2. MATTERS ARISING

### STANDARDS FOR NEW ZEALAND LANDFILLS

It was noted that an approach would be made to the Ministers of the Environment and Commerce once the report on the review of consents for existing landfills, in terms of the Resource Management Act, had been received from Buddle Findlay in approximately two weeks time.

In addition it was agreed that the identification of priorities for action at a national level by the Government to reduce residual waste to landfill would be discussed by the working party established at the previous meeting.

After further discussion it was also **resolved** that the meeting with the Ministers should not include local Canterbury MPs as decided at the previous meeting.
