

6. CITYWIDE PARKING STRATEGY

The Board was updated on the release of the Citywide Parking Strategy for public consultation. This follows a process of input from focus groups, Council officers, and elected member seminars.

After the closing of submissions (22 November 2002), a report will be presented to elected members in February 2003. Formal adoption of the strategy is scheduled for March 2003.

The Board **received** the information and referred the strategy to its Transport and Roading Committee for further consideration and gave 'power to act' to that Committee to make a submission.
