

2. DEPUTATIONS BY APPOINTMENT

(a) Residents of Stapletons Road

John Scurr and another resident of Stapletons Road spoke to the Board regarding the excessive speed of cars using Stapletons Road. The use of the road has increased owing to the lights on the corner of North Parade and Averill Street, and the number of schools in the area where students have cars. The residents requested that City Streets carry out a review of the street. The residents advised that some of the cars are local, but no particular cars had been identified.

Board members suggested that the residents become involved in the Residents' Association and make submissions to the Council; this would help the board with prioritisation of kerb and channel renewal. Stapletons Road is not currently on the five year plan for kerb and channel renewal or as a living street.

The Board requested a report from staff on immediate assistance with the speed trailer and enforcement, and a longer term solution.
