

2. PARKLANDS LIBRARY - CONCEPT DESIGN AND COST ISSUES

Ian McKenzie, Project Team Manager advised that while the Parklands Library was not at the stage of development reached with the Upper Riccarton Library, similar issues were being faced. A PowerPoint presentation was then provided covering:

- Existing building layout,
- Site plan,
 - Car parking requirements,
 - Lighting and heating provisions,
- Connection to shopping mall,
- Flexibility of building - utilisation outside public hours,
- Roof features - wave motion,
- Landscape concept plan.

The Committee **decided:**

1. That a further report on the funding of the Parklands Library project be provided to both the Arts, Culture and Heritage Committee and the Property and Major Projects Committee, including the possibility of a funding substitution from other sources.
2. That arrangements be made to carry out a site inspection of the proposed library site.
