

5. SAFETY ISSUES AT KERRS REACH

The Committee considered a report from Kevin Collier, Community and Recreation Sports Adviser, providing information on progress on addressing the safety issues for users of Kerrs Reach and the Avon River training and competition area.

The Community and Recreation Unit Sports Adviser met with representatives of the groups who are current river users in April, to discuss the problem.

The Committee **decided** that the Community and Recreation Unit should continue to monitor the effectiveness of agreed solutions for specialised traffic guidelines in addition to the generic marine regulations; assist with the review of the solutions in December 2004 and assist with a dispute resolution process.
