

5. THE GROYNES SHARED CHRISTCHURCH CITY COUNCIL/ NORTH CANTERBURY FISH AND GAME COUNCIL FACILITY INVESTIGATION

The Committee considered a report from Derek Roozen (Strategic Open Space Planner, Greenspace Unit) informing the Committee of the current status of the investigation into the proposed Christchurch City Council/North Canterbury Fish and Game facility at 'The Groynes'. The report was also considered by the Shirley/Papanui Community Board at its meeting on Wednesday, 7 July 2004, and by the Community and Leisure Committee at its meeting on Monday, 12 July 2004.

The reply outlined:

- background
- investigation
- new options
- response from the North Canterbury Fish and Game Council
- overall planning context for 'The Groynes' and the current situation
- area plans for Belfast and Clearwater.

The Committee **decided**:

1. That the information be received.
2. That the Greenspace Unit's intention to continue to develop and update the concept plan for The Groynes, as well as plan for the wider area, including the Otukaikino Creek and Waimakariri River catchments be noted.
3. That the Council continue to work with the North Canterbury Fish and Game Council to find an appropriate locality for the facility.
