

8. CERTIFICATION OF WASTE SENT TO KATE VALLEY LANDFILL

The Subcommittee considered this report which recommended that all shareholder councils adopt a uniform approach when certifying that waste sent to the Kate Valley Landfill complies with the requirements of the resource consent conditions.

The report noted that the suggested draft recommendation previously obtained from Buddle Findlay had now been amended and strengthened and an amended form of resolution was contained within the report.

The Subcommittee **resolved** to recommend to shareholder councils that each respective council use the proposed resolution contained within the report in respect to the certification for waste sent to the Kate Valley Landfill as from 1 June 2005.
