<b>1,283</b>			<b>1,061</b>	<b>-</b>	<b>(1,061)</b>

Rationale for activity funding (see also the Revenue and Financing Policy)

Revenue is sought from fees, sponsorship and subsidies where possible. The balance of the net operating cost is funded by general rates, as the whole community benefits from these activities.

Capital expenditure is funded corporately in accordance with the Revenue and Financing Policy.

## Explanation of operational variances from the LTCCP

1. Significant extra costs have been included to enable the Central City Plan to be undertaken. There is also \$0.5m included for structural engineer/conservation architect costs for heritage demolitions.
2. Private plan change revenue has increased from the LTCCP.
3. Cost recoveries have increased for the Regional Policy Statement Plan Change 1 and the Urban Development Strategy. Some of this is offset by \$0.3m less revenue from Tram operations.
4. The Energy show home was decommissioned during the 2009/10 year.
5. Heritage restricted properties are budgeted to get \$0.25m less revenue because of earthquake damage.

## Explanation of capital variances from the LTCCP

6. Unused 2010/11 budget for Heritage maintenance works carried forward will be sufficient for 2011/12 work. Planned budget deferred to future years.
7. Annual budget for inner city initiatives removed pending the Central City Plan.

## Community support

2010/11 Plan \$000		Note	2011/12 LTCCP \$000	2011/12 Plan \$000	Variance To LTCCP

<b>6,011</b>			<b>6,610</b>	<b>3,470</b>	<b>(3,140)</b>

Rationale for activity funding (see also the Revenue and Financing Policy)

Housing expenditure is fully funded from Housing revenue and is not subsidised by rates.

User charges for services provided are collected at a level considered reasonable by the Council. For some services, making a user charge would counter Council's policy of providing open access to services. The balance of the net operating cost is funded by general rates, as the whole community benefits from these activities.

Capital expenditure is funded corporately in accordance with the Revenue and Financing Policy.

### Explanation of operational variances from the LTCCP

- Expenditure and revenue has been reduced to reflect the closure of both the QEII and Tuam St Early learning centres during 2010/11 following the February earthquake, and there are no longer costs or revenue for this facility included in the Annual Plan.
- The LTCCP incorporated a \$1.5 million grants reduction in the Community Grants Activity. Some of the actual grants reduction was taken from Events and Festivals and Heritage activities. In addition, the Court Theatre capital grant has been deferred and removed from the 2011/12 Annual Plan.
- Social Housing revenue has decreased by \$0.4 million from uninhabitable housing units following the September earthquake and another \$0.7 million following the February earthquake, and \$0.5 million as the CGPI inflation increase was lower than forecast in the LTCCP. Social Housing expenditure has decreased due to maintenance contract savings and lower depreciation charges as well as a reduced maintenance programme to offset the reduction in revenue. Offsetting this there have been higher insurance premiums planned.
- Civil Defence expenditure includes \$18 million of welfare expenditure on the provision of temporary facilities such as portable/chemical toilets and individual septic tanks which is fully recoverable from the Ministry of Civil Defence. There is also reduced depreciation charges resulting from the delayed start in building the new Civil Defence Building.
- Walk-in services budgets are reduced by \$0.45 million in 2011/12 to reflect the true cost split between Walk-in services and Phone services, which are part of the Corporate Activity. The balance of the variance relates to the removal of the rubbish bag services which are no longer required due to the three bin service.

### Explanation of capital variances from the LTCCP

- The Colombo Street store site redevelopment has been deferred to allow for further planning of the site, and the expansion of the St Albans Resource Centre has been deferred due to earthquake damage that requires repair before any expansion can commence.

# Grants Summary

*Rationale for activity funding (see also the Revenue and Financing Policy)*

Due to the customer focus of this activity user charges are collected for services at a level considered reasonable by the Council and in line with Council's policy of open access to services.

Revenue is also sought from grants and subsidies where possible. The balance of the net operating cost is funded by general rates as the whole community benefits from these activities.

Development contributions are applied towards appropriate capital expenditure. The balance of capital expenditure is funded

### Explanation of operational variances from the LTCCP

1. The Canterbury Museum redevelopment grant planned for 2011/12 has been moved to the 2012/13 financial year.
2. Libraries expenditure and revenue is lower due to the Central Library being closed to the public for at least the next year.
3. Art Gallery revenue has been reduced by \$0.4 million as there is no fee paying exhibition planned in the 2011/12 year and external sponsorship targets have been reduced due to difficulties meeting these within the current economic and fundraising climate.
4. Development Contributions have been reduced to reflect the lower level of subdivisions being developed in the current market.

### Explanation of capital variances from the LTCCP

5. Library monographs/Book purchases have been shifted from increased demand to renewals and replacements. In addition, the Libraries renewals programme has been reduced for the year in a review of requirements after the 22 February earthquake.

# Democracy and governance

2010/11 Plan \$000		Note	2011/12 LTCCP \$000	2011/12 Plan \$000	Variance To LTCCP

<b>-</b>			<b>-</b>	<b>-</b>	<b>-</b>

*Rationale for activity funding (see also the Revenue and Financing Policy)*

There are few opportunities for direct revenue from these activities. The balance of the net operating cost is funded by general rates, as the whole community benefits from these activities.

Capital expenditure is funded corporately in accordance with the Revenue and Financing Policy.

## Explanation of operational variances from the LTCCP

1. Variance relates to an adjustment to Communication costs allocated from the Corporate group of activities.

## Explanation of capital variances from the LTCCP

There are no variances.

## Economic development

2010/11 Plan \$000		Note	2011/12 LTCCP \$000	2011/12 Plan \$000	Variance To LTCCP

Revenue is sought from fees, grants and subsidies where possible. The balance of the net operating cost is funded by general rates, as the whole community benefits from these activities.

Capital expenditure is funded corporately in accordance with the Revenue and Financing Policy.

### Explanation of operational variances from the LTCCP

1. \$0.35 million is included being the second year of the 'CCT Australia Campaign' Grant approved in the 2010/11 Annual Plan. Regional Economic Development Grants to CCT and CDC are slightly lower than forecast in the LTCCP as they are not inflation adjusted.

### Explanation of capital variances from the LTCCP

2. The increase is for the purchase of events equipment which was previously budgeted under Recreation & Leisure.

## Parks and open spaces

2010/11 Plan \$000		Note	2011/12 LTCCP \$000	2011/12 Plan \$000	Variance To LTCCP

Rationale for activity funding (see also the Revenue and Financing Policy)

User charges for certain services, such as cemeteries and ground hire, are collected at levels considered reasonable by the Council. In many areas, such as providing access to open spaces, charging is not feasible.

Revenue from Grants and Subsidies are sought where possible. The balance of the net operating cost is funded by general rates, as the whole community benefits from these activities.

Development contributions are applied towards appropriate capital expenditure. The balance is funded corporately in accordance with the Revenue and Financing Policy.

### Explanation of operational variances from the LTCCP

1. Depreciation has reduced by \$2.3 million, while \$5.0 million of earthquake related operational expense was added (\$3.5 million Land Drainage and \$1.5 million Parks).
2. Earthquake insurance and recoveries of \$1.475 million have been added to the Parks budget.
3. Cemeteries revenue budgets have been reduced to reflect the lower number of burials.
4. Earthquake insurance and recoveries of \$3.5 million have been added to the Land Drainage budget.
5. Development Contributions have been reduced to reflect the lower level of subdivisions being developed in the current market.

### Explanation of capital variances from the LTCCP

6. The renewal programme across this group of activities has been reviewed in light of the damage inflicted by the 22 February earthquake. The programme has been reduced to remove works that are in the rebuild areas and are covered by the new Infrastructure Rebuild Programme.
7. Staff have made an assessment of the cash flow for the rebuild based on the current estimate and likely programme across this group of activities.
8. The Botanic Gardens Entry Pavilion construction has been reprogrammed in light of delays caused by the recent earthquakes. In addition, development on new parks has been reduced in light of the post-earthquake programme.
9. Programmes for work in new parks and facilities and land drainage have been reduced in the earthquake damaged areas

## Recreation and leisure

-	Grants, Subsidies and other		-	-	-
<b>4,932</b>			<b>4,210</b>	<b>4,310</b>	<b>100</b>

### Notes

\* In those years when the collection of Development Contributions provides funds for capital expenditure in future years these funds are used to reduce Council's borrowing requirements (shown here as negative borrowing).

### Rationale for activity funding (see also the Revenue and Financing Policy)

User charges for these activities are collected at a level considered reasonable by Council and in line with Council's policy of promoting recreational and leisure activities. Revenue is also sought from Grants and Subsidies where they are available. The balance of the Net Cost of Services is funded by general rates as the whole community benefits from these activities.

Development contributions are applied towards appropriate capital expenditure. The balance of capital expenditure is funded corporately in accordance with the Revenue and Financing Policy.

### Explanation of operational variances from the LTCCP

1. Both the QEII Park Recreation and Sport Centre and the Centennial Recreation and Sport Centre are closed to the public. There are no longer costs or revenue for these facilities included in the Annual Plan. In addition, the delay in resource consent and subsequent build of the Graham Condon Leisure Centre has delayed the opening by 12 months resulting in one-off savings in 2011/12.

2. Events and Festivals have increased since the original LTCCP due to a one off cost in 2011/12 relating to the Rugby World Cup of \$0.73 million; an increase of \$0.45 million for Iconic events (funded from the Capital Endowment Fund); an increase to the Events and Festival fund of \$0.26 million (to maintain the existing programme), and minor increases to funding for other in-house events and festivals to maintain the existing programme.

3. Development Contributions have been reduced to reflect the lower level of subdivisions being developed in the current market.

### Explanation of capital variances from the LTCCP

4. The renewal programme across this group of activities has been reviewed in light of the damage inflicted by the 22 February earthquake. The programme has been reduced to remove work in earthquake damaged facilities where these will be covered by the Facilities Rebuild programme.

5. The Graham Condon Leisure Centre has been reprogrammed following delays associated with the resource consent. Ruapuna purchases have been incorporated into Strategic Land Acquisitions under the Corporate group of activities.

## Refuse minimisation and disposal

<b>1,046</b>		<b>1,042</b>	<b>7,934</b>	<b>6,892</b>

*Rationale for activity funding (see also the Revenue and Financing Policy)*

User charges are collected for services considered reasonable by the Council to fulfil the objectives of the service and within the constraints of the market.

The net cost of Recyclable Materials Collection and Processing and Organic Material Collection and Processing is funded by a uniform targeted rate on serviced properties.

The balance of the net operating cost is funded by general rates, as the whole community benefits from these activities.

Capital expenditure is funded corporately in accordance with the Revenue and Financing Policy.

### Explanation of operational variances from the LTCCP

- The accounting treatment of the Materials Recovery Facility, not agreed at the time of completing the LTCCP, results in an additional \$0.5 million of depreciation, with compensating additional income. Collection costs have reduced slightly.
- Residual Waste volumes under the kerbside collection system have proven to be higher than was modelled in the LTCCP. This results in \$0.8 million of additional disposal costs and \$0.6 million less in revenue from central city bin bag sales. The additional disposal costs are offset by reduced depreciation at Burwood landfill of \$0.6 million.
- Depreciation from the Organics Plant was overestimated by \$0.6 million in the LTCCP. Modelling of expected volumes of organic waste was also overestimated, resulting in a \$1.7 million reduction in collection & processing costs. The remaining variance is due to movements in depreciation and debt servicing costs since the earthquake.
- The Waste Minimisation Levy income of \$1.4 million was included as part of the Residual Waste Activity in the LTCCP. This has been moved to the Organics Activity as the intent of the levy is to encourage a reduction in waste to landfill.

### Explanation of capital variances from the LTCCP

- Staff have made an assessment of the cash flow for the rebuild based on the current estimate and likely programme across this group of activities.

## Regulatory services

2010/11 Plan \$000		Note	2011/12 LTCCP \$000	2011/12 Plan \$000	Variance To LTCCP

-	Grants, Subsidies and other		-	-	-
<b>10</b>			<b>46</b>	<b>45</b>	<b>(1)</b>

*Rationale for activity funding (see also the Revenue and Financing Policy)*

User charges are collected for services considered reasonable by the Council and the costs of direct benefit activities are generally recovered in full.

The balance of the net operating cost is funded by general rates as the whole community benefits from these activities.

Capital expenditure is funded corporately in accordance with the Revenue and Financing Policy.

### Explanation of operational variances from the LTCCP

1. Expenditure is up \$1 million due to increases in staff and operational costs relating to cordon management, liquor licensing, health licensing and noise control.
2. Expenditure is higher, partly due to increases in staff and operational costs relating to consents and earthquake tasks which are offset by increased revenue (note 4). Costs for the Royal Commission are also included. The provision for weather tight home claims has been increased by \$0.8 million. \$0.4 million has been paid to Riskpool to enable it to meet its exposure to weathertight claims.
3. Lower revenue of \$3.2 million is mainly due to less parking infringement and court recoveries as enforcement within the CBD is not possible following the earthquake.
4. Revenue is \$4.3 million higher than the LTCCP due to building consents, building inspections and the recovery through fees of the Earthquake Unit setup costs.

### Explanation of capital variances from the LTCCP

There are no significant variances.

## Streets and transport

2010/11 Plan \$000		Note	2011/12 LTCCP \$000	2011/12 Plan \$000	Variance To LTCCP

Rationale for activity funding (see also the Revenue and Financing Policy)

User charges for certain services, such as parking fees, are collected at levels considered reasonable by the Council. Subsidies will be claimed from the New Zealand Transport Agency (NZTA) for both operational and capital expenditure to the maximum allowed. The balance of the net operating cost is funded by general rates, with a loading on the Business sector.

Development contributions are applied towards appropriate capital expenditure. The balance of capital expenditure is funded corporately in accordance with the Revenue and Financing Policy.

### Explanation of operational variances from the LTCCP

- Depreciation has reduced by \$5.2 million and there has been a net reduction of \$2.25 million in Road network planning and asset management costs. Road Safety programmes have moved to Active Travel. \$13 million of earthquake-related operational expenditure has been added to the budget.
- Depreciation has reduced by \$1.3 million. Road Safety programmes have moved from Road Network, and there has been a net reduction of \$1 million in Active Travel maintenance costs due to access issues following the earthquake.
- Parking operational costs have reduced \$0.2 million for On-Street, and \$3.3 million for Off-Street due to the reduced level of parking facilities available following the earthquake.
- Depreciation charges have increased by \$1.2 million due to a 2010 revaluation, and Asset Planning and Management charges have increased by \$0.2 million. The operating budget has been reduced by \$1 million for the Shuttle Bus and \$1 million for the Bus Exchange as the services are no longer available.
- \$9.825 million of NZTA subsidy was added to the budget as subsidy on the earthquake operational budget. Offsetting this is a \$2.4 million reduction in normal subsidies and rental income following the earthquake. Road Safety subsidies have been transferred to Active Travel.
- NZTA subsidy has moved with the Road Safety programmes from Road Network.
- Revenue for both On Street and Off Street Parking has been reduced by \$8 million, reflecting the fewer parking spaces available. In addition a further \$1.3 million reduction was made as revenue in the LTCCP was overstated.
- NZTA Subsidy has been reduced by \$0.5 million due to the non operation of the Bus Exchange. \$0.8 million reflects the loss of commercial rental revenue for buildings and car parks on the New Bus Interchange site.
- This reflects a timing reduction of \$30 million of NZTA subsidy in line with the timing change to the New Transport Interchange project, and the deferral of other capital projects. \$79 million of NZTA Subsidy for earthquake roading capital projects is now included.

### Explanation of capital variances from the LTCCP

- The renewal programme across this group of activities has been reviewed in light of the damage inflicted by the 22 February earthquake. The programme has been reduced to remove works that are in the rebuild areas and are covered by the Infrastructure Rebuild Programme. Reductions include \$23.3m in kerb and channel renewals, \$5.6m in carriageway resurfacing and smoothing, and \$3.4m in footpath resurfacing.
- Staff have made an assessment of the cash flow for the rebuild based on the current estimate and likely programme across this group of activities.
- The Main Road Three-Laning project has been brought forward to coincide with the construction of the Ferrymead Bridge. The Transport Interchange project has been reprogrammed pending the Central City Plan for rebuilding the CBD. Wigram Magdala Grade Separation has been extended by one year to coincide with the construction of the Southern Motorway, and the Moa Caving Fencing has been deferred from last year to coincide with the Moa Cave protection project.

12 & 13. Ferrymead Bridge has had additional budget added due to additional strengthening required, and complexities found during the design process. The Hayton Road extension has been removed from the programme. The Summer bus priority project has been reprogrammed to allow for construction of the Main Road Three-Laning project. The Central City, Hornby and New Brighton bus priority and Transport Interchange projects have been deferred pending the Central City Plan impact on the Public Transport programme. The Avonside/Fitzgerald project has been deferred for five years. Marshlands /Prestons and Deans/Riccarton/Riccarton intersection improvements have also been deferred pending review of requirements after the February Earthquake. Other reductions resulting from the post earthquake review have been made in street lighting, cycleway improvements and neighbourhood improvements.

## Wastewater collection and treatment

2010/11 Plan \$000		Note	2011/12 LTCCP \$000	2011/12 Plan \$000	Variance To LTCCP

-	Grants, Subsidies and other		-	-	-
<b>56,752</b>			<b>29,400</b>	<b>160,888</b>	<b>131,488</b>

Rationale for activity funding (see also the Revenue and Financing Policy)

User charges for certain services, such as trade waste, are collected at levels considered reasonable by the Council. The balance of the net operating cost is funded by a targeted rate on serviced properties based on capital value.

Development contributions are applied towards appropriate capital expenditure. The balance of capital expenditure is funded corporately in accordance with the Revenue and Financing Policy.

### Explanation of operational variances from the LTCCP

1. Depreciation has reduced by \$4.5 million in total, \$4.4million in Wastewater Collection & \$0.1 million in Wastewater Treatment.
2. Additional earthquake-related maintenance and operating costs of \$22 million are planned, of which \$21 million is recoverable and included in revenue.
3. Underlying BAU maintenance costs associated with Wastewater Collection are \$1 million less than in the LTCCP due to a new contractual agreement with City Care Limited.
4. Various efficiencies and process changes within the Christchurch Wastewater Treatment Plant have reduced operating costs by \$0.3 million.
5. Trade waste revenues have increased by \$0.7 million due to better monitoring and compliance by trade waste producers.
6. Development Contributions are reduced by \$6.2 million. The remainder of the variance relates to recoveries for additional earthquake-related capital expenditure.

### Explanation of capital variances from the LTCCP

7. The renewal programme across this group of activities has been reviewed in light of the damage inflicted by the 22 February earthquake. The programme has been reduced to remove works that are in the rebuild areas and are covered by the new Infrastructure Rebuild Programme. Changes include wastewater reticulation and mains renewals.
8. Staff have made an assessment of the cash flow for the rebuild based on the current estimate and likely programme across this group of activities.
9. Akaroa Wastewater Treatment Plant improvements have been deferred for two years to resolve funding for the land purchase component. The Aeration Expansion project for the Christchurch Wastewater Treatment Plant has been deferred until earthquake repairs are completed
10. The Pump Station 60 upgrade has been deferred by one year. Offsetting this, the Wigram Pressure Main Extension has been advanced from 2012/13 to re-align with planned completion of the Western Interceptor.

## Water supply

777	Grants, Subsidies and other		819	777	(42)
<b>13,763</b>			<b>14,175</b>	<b>23,091</b>	<b>8,916</b>

*Rationale for activity funding (see also the Revenue and Financing Policy)*

User charges (technically classified as a rate) are made for excess water supplied at the average cost of water. The balance of the net operating cost is funded by a targeted rate on serviced properties based on capital value.

Development contributions are applied towards appropriate capital expenditure. The balance of capital expenditure is funded corporately in accordance with the Revenue and Financing Policy.

### Explanation of operational variances from the LTCCP

1. Depreciation has increased by \$1.1 million due to revaluation of Water Supply assets in 2010.
2. Costs associated with Water Supply Asset Mgmt and Planning have reduced by \$0.2 million reflecting current results.
3. The premises of a number of excess water consumers are not accessible due to earthquake damage, and revenue will drop accordingly.
4. Development Contributions have been reduced by \$2 million. \$14 million of capital revenues are the result of earthquake related recoveries on additional earthquake related capital expenditure.

### Explanation of capital variances from the LTCCP

5. The Palmers Road Pump Station renewal project has been removed as the pump station was destroyed by the earthquake, and is being rebuilt under insurance. The renewal programme across this group of activities has also been reviewed in light of the damage inflicted by the 22 February earthquake. The programme has been reduced to remove works that are in the rebuild areas that are covered by the new Infrastructure Rebuild Programme.

6. Staff have made an assessment of the cash flow for the rebuild based on the current estimate and likely programme across this group of activities.

### Notes

\* In those years where other sources of funding exceed the amount needed to fund capital expenditure that excess is used to reduce corporate borrowing (shown here as negative borrowing).

### Explanation of operational variances from the LTCCP

1. There are more Internal Services now than at the time of the LTCCP resulting in higher expenditure and offsetting revenue.
2. CCHL's dividend was revised down by \$14 million from that stated in the LTCCP due to the earthquake.
3. This reduction is due to the conversion of Vbase debt to equity.
4. Interest rates are lower than those forecast at the time of the LTCCP.
5. Includes \$52.2 million of earthquake cost recoveries relating to the rebuild.

### Explanation of capital variances from the LTCCP

6. \$1.1 million of IM&CT Renewals were converted to operational expenditure following implementation of the Data Centre.
7. Staff have made an assessment of the cash flow for the rebuild based on the current estimate and likely programme for restoring Council facilities.
8. \$20 million of projects that were expected to be completed in 2010/11 have been delayed due to the earthquake. A new investment of \$2.5 million in an agency to secure Local Government funding has been added, and a further \$9 million provided for Vbase equity. Offsetting this is \$6.4 million for the Convention Centre expansion which has been deferred.
9. This is the net impact of strategic land purchases less land reallocated to other activities.

# Capital Endowment Fund

In April 2001, Council set up a Capital Endowment Fund of \$75M. This fund was established using a share of the proceeds from the sale of Orion's investment in a gas company. The Fund provides an ongoing income stream which can be applied to economic development and civic and community projects.

Current Council resolutions in respect of the fund are;

1. that the income from the fund be allocated each year in the following way:

Economic Development	70%
Civic and Community	30%

the above general categories be reviewed on a three yearly cycle, the next review aligning with the 2012/22 LTCCP, or if the interest earned from the fund changes significantly (increase or decrease) within the next three years,

2. that if desired, funding for a particular category be carried forward to another year,

3. that no single project be funded for more than three years, except in exceptional circumstances,

4. that the capital of the fund will not be used unless 80% of councillors vote in favour,

5. funds are managed in accordance with Council's Investment Policy.

6. With regards the Civic and Community portion;

projects implement a strong community strategic plan,

projects are of city-wide benefit,

priority is given to new community facilities,

projects only more than \$50k will be considered.

\$850k committed annually for advancement of capital projects which meet the criteria and the balance of the fund being available for individual projects or grants.

2010/11 Plan \$000	Capital Endowment Fund Movements	2011/12 LTCCP \$000	2011/12 Plan \$000	Variance To LTCCP
