8. FACILITIES REBUILD PLAN: DETAILED ENGINEERING EVALUATION PROGRAMME

General Manager responsible:	General Manager Community Services, DDI 941-8607
Officer responsible:	Corporate Support Unit Manager
Author:	Darren Moses, Project Management - Facilities & Planning, CP-Project Management Unit

PURPOSE OF REPORT

- 1. The purpose of this report is to:
 - (a) Confirm the criteria used to prioritise the Detailed Engineering Evaluation (DEE) assessments.
 - (b) Approve the DRAFT Detailed Engineering Evaluation (DEE) prioritised programme.
 - (c) Recommend the Council issue the DRAFT prioritised programme to Community Boards for further input.

EXECUTIVE SUMMARY

- 2. There have been a number of inputs and layers considered in the prioritisation of the Facilities Rebuild Plan DEE Assessment Programme prioritisation process. These are summarised within three categories expressed as Occupancy, Use and Physical Attributes. These are elaborated upon in **Attachment 1**.
- 3. The Occupancy category takes into consideration factors such as the type and number of users of the building and the duration of time the building is occupied.
- 4. The Use category considers the nature of the activity that occurs in the building. This may be a critical activity for Council or a function that scores high for community significance. This category also considers any existing landlord obligations that Council may have.
- 5. The Physical Attribute category considers amongst other things, factors such as the age of the building, material, heritage significance and size/complexity of the building. This category also notes the nature of the damage and those buildings with minimal damage may land in this category.
- 6. This multi-criteria categorisation generates a list of buildings with higher priorities and then schedules these for DEE inspection first. These are displayed in **Attachment 2**.
- 7. The prioritisation has been completed by a number of staff, including CPEng structural engineers, asset owners, facility managers, property asset management team and was also workshopped with council in November 2011.
- 8. Where groups of facilities are co-located (e.g. pools and related buildings) or are in more remote locations, these may have been grouped together and will show as multiple categories being actioned at one time. This is primarily for economic reasons (one visit per location by engineers).
- 9. In order to inform the finalisation of the list, Community Boards can input any amendments to the draft prioritised list, taking into account matters of community significance.
- 10. The prioritised DEE assessment programme includes 699 residential buildings. The Council, like other property owners, is required to follow EQC processes in regard to residential claims and this in some cases will include structural assessments. For the majority of these buildings the Council is currently waiting for the EQC assessment process to follow its course. Some specific properties have a building profile that we believe justifies an early assessment to clarify the strength of the building and we have scheduled DEEs for these properties. There are currently 64 City Housing buildings (10 complexes) being scoped.

8 Cont'd

FINANCIAL IMPLICATIONS

11. The building assessment work required to inform the Facilities Rebuild Plan is generally funded from insurance monies, where a building's structure is damaged and a legitimate successful insurance claim is processed. Where the building's structure is not damaged the assessment costs will be borne by the Council.

Do the Recommendations of this Report Align with 2009-19 LTCCP budgets?

12. No. The purpose of this report is in response to the series of earthquakes that have recently struck Christchurch to inform future LTCCP and Annual Plan processes.

LEGAL CONSIDERATIONS

13. Not Applicable.

Have you considered the legal implications of the issue under consideration?

14. As above.

ALIGNMENT WITH LTCCP AND ACTIVITY MANAGEMENT PLANS

15. No. The purpose of this report is in response to the series of earthquakes that have recently struck Christchurch to inform future LTCCP and Annual Plan processes.

Do the recommendations of this report support a level of service or project in the 2009-19 LTCCP?

16. As above.

ALIGNMENT WITH STRATEGIES

17. Yes the purpose of this report is to deliver a revised set of strategies in terms of service delivery and supporting facilities plans to assist with the rebuild of Christchurch.

Do the recommendations align with the Council's strategies?

18. As above.

CONSULTATION FULFILMENT

19. Not applicable.

STAFF RECOMMENDATION

It is recommended that the Council:

- (a) Confirm the criteria used to prioritise the Detailed Engineering Evaluation (DEE) assessments.
- (b) Confirm the DRAFT DEE prioritised programme.
- (c) Refer the list to the Community Boards to obtain their feedback prior to Council adoption of the finalised list.

Attachment 1

Facilities Rebuild Programme : Non Residential Facilities

DEE Assessment Prioritisation Programme – informed by categorisation

	Criteria f	or Assessment Prioritisation by	v Category
	OCCUPANCY	USE	PHYSICAL ATTRIBUTES
CATEGORY	Staff, Public, Children, Duration	Critical Operations, Community Significance	Material, Height, Age, Condition, Heritage, EPB, Ground Conditions,
Priority 1 (combination of criteria)	 Large number of occupants Duration Buildings occupied 	 High use Critical operations High community significance Landlord/Tenant obligations 	 Dangerous High risk Multi story Likely EPB Large/complex buildings CERA notice required Minor repairs, non structural
Priority 2 (any one of the criteria)	 Large number of occupants Duration Buildings occupied 	 High use Critical operations High community significance Landlord/Tenant obligations 	 Dangerous High risk Multi story Likely EPB Large/complex buildings CERA notice required Minor repairs, non structural
Priority 3	 Small/medium number of occupants Single occupancy Short term duration 	 Infrequent Use Medium community significance 	• Low risk
Priority 4	 Non occupied building Closed 	 Not critical Low community significance 	 No threat/impact on other buildings

Categories

Priority One: Contains those facilities which have been assessed as having a combination of the Occupancy, Use, Physical Attributes criteria. for example a building housing critical operations and multi story would trigger a priority 1 rating.

Priority Two: Contains those facilities which have been assessed as having anyone of the Occupancy, Use, Physical Attributes criteria. For example high use alone would trigger a priority 2 rating.

Priority Three: Low risk facilities.

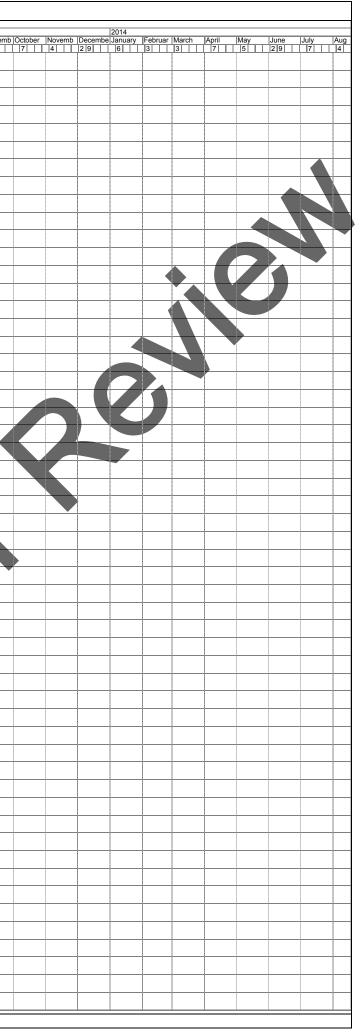

Priority Four: These facilities are either currently closed, not in use or have no short term plans to occupy.

Assessment and Repair

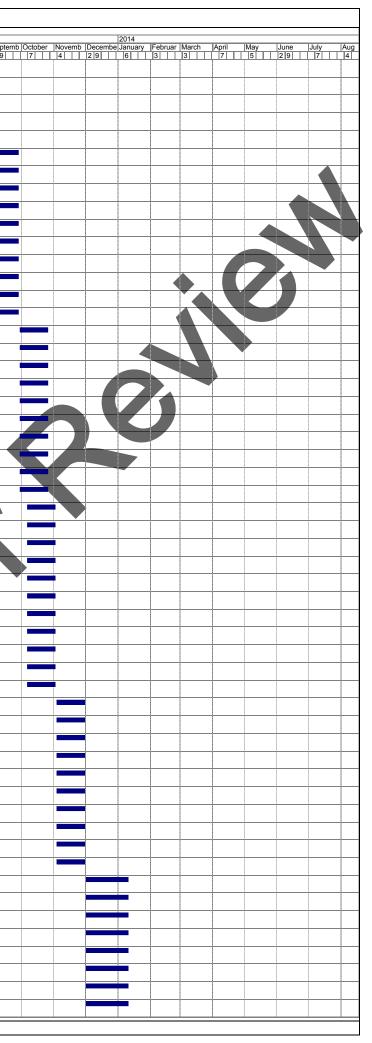

Quick Wins: These show as 'Quick Wins' in the Category column of the Prioritised Dee list and are the sites where minor repair work could be commenced. This work would comply with the delegated authority to proceed with minor repair works for facilities where work costs less than or equal to \$5,000 and is within the insured value (excludes heritage properties).
