

Save Wigram Air base from being cut up for housing. Should be retained as last open space left by the city. Should keep it open to re-reaction for future use as well. Hagley Park is not unlimited in use. Need a bigger open air space for venues such as public council function. As Wigram has good access and parking. Also retain the runway as a secondary airport. Many people spoken to does agree or support it. I suggest the city should buy it back instead of bailing out failed investors. I am, as many others accept to contribute if necessary. The most important thing is not allow Wigram Air base to be used for housing and must be retained as the city heritage!
