Your Submission:

Water and Waste Water Little River.
It concerns me that the upgrade of water and waste water systems are not a priority for the council. Development in Little River is being delayed because of the lack of these services. I believe it is important to upgrade both amenities at the same time. Currently the Rail trail is attracting 10,000 users a year(DOC figures).
This will increase when the trail has been completed right through to Ch Ch and will add pressure to the facilities in Little River.
With the compromised water of Lake Waiwera and its tributaries we can not afford to leave the ad hoc waste water system in its current state.
Development is inevitable. Where is the commitment from the council to plan and upgrade our water and waste water system?
