**Your Submission:**

I would like the council to very strongly reconsider the time frame for connecting Charteris Bay up to mains water and sewerage. On top of this Diamond Harbour needs to be connected to the main city sewerage.

Due to the current situation my brother and I cannot move forward and plan for the future with regards to developing our section. It is incredibly frustrating. We were viewing 2010 as our time frame, we began forming plans, yet once again we've had to reconsider.

Another major reason for this work needing to be carried out is that Lyttelton Harbour is a stunning, natural playground. I've spent my life swimming and sailing here. In the past it has been a dumping ground for Lyttelton sewerage and is still receiving sewerage from Diamond Harbour and Governor's Bay. If we want to back up the great work being done on Quail Island then lets clean up the Harbour too and connect sewerage to the city infrastructure.

Finally, during summer the number of people in Charteris Bay majorly increases and many septic tank systems struggle to cope. The smell of sewerage makes me feel as though I'm in the third world and sometimes the smell is not the only problem!
