Your Submission:	<p>To whom it may concern:</p> <p>My concerns regarding the delay in water and sewerage for Charteris bay are:</p> <ol style="list-style-type: none">1) We often run out of water in a drought month. Water is \$123.00 a load and we often have to wait days for it to be delivered.2) The sewerage is in many cases stored in old tanks and they leak. I worry about the environmental effect this has on the marine life. The safety of swimmers health is also compromised.3) The smell these tanks give off is very unpleasant.4) We pay high enough rates in this area to at least have water and sewerage provided. <p>yours Sincerely,</p> <p>Carol Matthews. 11 Andersons Road Charteris Bay RD 1 Lyttelton.</p>
