<b>Your Submission:</b>	<p>Sir/ madam</p> <p>I wish to have my disappointment with the treatment of the Charteris Bay Water and Wastewater Scheme i.e. this important item's removal from the LTCCP.</p> <p>Frankly, I should not be surprised and the council's latest poor performance is completely consistent with its' complete disregard to this communities wishes, I note in particular your councils performance regarding the Black Point debacle.</p> <p>I have recently been tormented by your building consent process (which took the best part of a year). I now face additional expense of retro- fitting a sewage system where previously I had been building with the assumption that I would have the opportunity to join the house to mains water and sewage. I will, of course, be seeking financial redress from the council should your council renege on your LTCCP commitments.</p> <p>I fully endorse the communities joint submission that itemises the health, environmental and societal pressing issues surrounding the reneged LTCCP.</p> <p>Regards</p> <p>Mike Pearson 27 Bayview Road Charteris Bay</p>
