**Your Submission:**

Disposal of Waste Water in the Harbour Basin.  
I believe that the only option that should be considered with regards the disposal of wastewater from the harbour basin is that it should be pumped through to Bromley.  
It is by far the best action and I am definitely oposed to it being applied onto the land. The cost of land application together with other enviromental concerns as regards the effect this will have on both land and people makes this an obvious decision.  
There does not appear to be any strong evidence to support land application and the cost of acquiring land and reaching an agreement with landowners over this issue would be prohibitive.
