**Your Submission:**

I wish the Council to consider transferring of all Lyttelton harbour sewerage through to Bromley rather than considering any further Land use sewerage schemes.

The Bromley option is a much lower cost option and certainly appears to be a more proven safer option for the environment given that engineers have expressed concerns over the impact and the viability of a land use scheme in the Harbour Basin.

On a personal basis i have concerns that the land use scheme would not only affect the quality of living in the harbour, but would impact on the unique beauty of this environment.
