<b>Your Submission:</b>	<p>I would like to comment on a few parts of the Plan.</p> <p>1. Developers building new subdivisions</p> <p>I think the developers should contribute MORE money from the sale of their sections to provide adequate road widening/development (Planners - have you considered perhaps a light rail service - esp for the Northern suburbs) so that people living in these expensive new areas can enjoy better travel times into the city and everyone else in the city does not have to pay for the congestion/inconvenience/expense when the developers are making an absolute killing (and prob taking it overseas!) User Pays I say!!</p> <p>2. Water Supply</p> <p>Have you considered some of the awesome strategies they have in countries like Germany for better use/re-use of our precious water supplies. They dont use their beautiful pure tap water to wash their cars or water their gardens, they use the clean collected run off from stormwater etc</p> <p>We need to think outside the square and use systems that have worked well in advanced countries overseas, instead of trying to constantly re-invent the wheel and come up with fresh ideas here. Chances are, any idea we have has already been tried and tested before - lets get up with the 21st Century and use the great tools available to us NOW!!</p> <p>3. Ellerslie Flower Show</p> <p>Brilliant event - glad we are keeping it in Chch. Well done to everyone involved.</p> <p>4. Libraries</p> <p>Our most under-utilised resource for sure. I have only just discovered the huge amount of brilliant books, magazines, computer access, kids programmes etc ... its no longer just a boring place for nerds to hang out - everything you ever needed to know or wanted to find out can be found at the Library - and all for FREE!!! Thank you :) &amp; well done Council</p> <p>5. Parks</p> <p>As above - We have the best parks in NZ! There are playgrounds everywhere, all different &amp; exciting to explore and our kids absolutely love them! So thanks again for providing such great and FREE entertainment for our family.</p> <p>6.. Population changes</p> <p>Amidst a current baby boom, I would like to see the council support local community groups to help them get a High School in the north east suburbs (and more primary schools if necessary,) to ensure we have enough excellent</p>

schools in our city within safe travelling distances to grow wonderful, balanced & well educated young people.

Thanks for considering my submissions.
