Your Submission:

I have been involved for the past 3 year or more in development of a proposes new sports & community facility based at the Rawhiti Domain.

The committee has worked on this and has now , I believe come to a point when the Christchurch City Council must show some leadership and meaningful support for the project.

I have had many meeting with council staff, councillors and community boards and from all of these meetings we have nothing but encouragement and support for the project.

If this project goes ahead it will provide a substantial facility,for many years to come, for the use of all the citizens CHCH at a minimal cost to CCC. It will also provide employment in construction of the building and from then on on going bases for many people.

All the clubs involved are willing to contribute fund & time but I believe the council must also do there bit.

I don't believe I have to go into the details as many people at the council know what we have been working.

We believe it time for the council to stop the lip service to the project get behind it and show some real support by allocating funding & include it in the current LTCCP.

If this funding and support comes from the council we believe other funding

organisation will come on board.

The success of this project is in your hands so do something about and help us provide this wonderful facility for the rate payers of Christchurch.

Thanking you for your consideration

Trevor Morris :
President Rawhiti Golf Club
Committee Member Rawhiti Community Sports Inc.
