Please be as specific as possible to help Council understand your views.

Why do you want the Council to consider the provision of additional artificial fields? What specific action you think the Council should take? Why should this be done?

Council should complete and independent survey to determine what is an appropriate balance between supply and demand ^{of and} for artificial hockey turfs (and cricket pitches for that matter) Current supply of turfs ~~appears~~ to be totally inadequate with a number of teams having to play on grass pitches. This has spot development and H & S implications

Please continue on reverse side if further space is required.

Thank you for making this submission.
