Your Submission:	<p>Christchurch City Council new rubbish bins</p> <p>I am shocked to find that my rates are being used to pay an Australian Company to collect my rubbish bins. Are ratepayers aware that the Council has allowed local bin hire businesses to go bankrupt rather than give jobs to their local community?</p> <p>What were the City Councillors thinking when they made this decision?</p> <p>Will this change in future contracts?</p> <p>Cycling</p> <p>This raises the issue of when are we going to make cycling safer since the price of petrol went up and there being a potential increase in the numbers using this form of transport. In my visit to Germany particularly Munich which has a similar flat landscape to Christchurch. Cycle tracks there are on the footpath and they have the right of way over pedestrians on their side of the path making it much safer than being in the roadways.</p> <p>Would the council consider this plan.</p> <p>Doris Church</p>
