ChCh City Council,

Re the Annual Plan,

I would like to submit that all covered bus-stops become smoke free.

As a constant bus user I have discovered, on a wet day in particular, if a person sitting next to you at a stop, chooses to “light up”, you have few options.

This would not have to be a costly ruling. A simple sticker placed in the shelter would convey the message and in this anti- smoking age people would soon catch on. Secondly, I feel the council should make covered shelters a priority, to further encourage more people to use public transport . With thanks...

Janet A Hickford.....
