Cycleway Improvement Plan: from the plan proposed there appears to be no provision for improving the cycleway around the Eastuary along Humphreys Drive. I use this section of road most days cycling into the city and home in the evenings. The kerb of the road designated for cycling is very narrow and with a strong easterly wind blowing it is difficult to stay within the 0.5m 'corridor'. Can I suggest that a wider asphalt pavement is developed for cyclists and pedestrians, and possibly a flax shelter belt between the road and the eastuary. I don't mind the 70k/hr speed limit but would think a wider cycleway will provide more separation from the traffic. Trucks are very often within 0.5m of cyclist and there is no leeway for mistakes!
