<b>Your Submission:</b>	<p>Some years ago the Windermere Road Association was formed by local residents to protect the street from major alterations. These included the probability of the removal of memorial trees, road narrowing, speed humps and other "calming".</p> <p>Better than 95% of the 64 properties filled in a petition against such alterations to the street.</p> <p>Recently such changes have been made to the street without consultation, in flagrant disregard to that petition. A Council member told me that the residents were informed by letter, but that has been proven to be false. This member rang and abused me over the matter.</p> <p>It would appear that the Council takes no regard to the opinions of residents, bearing in mind that it (the Council) is paid for by ratepayers. It is the opinion of the majority of ratepayers that some members of the Council should be held accountable for the blatant disregard of ratepayers' concerns.</p> <p>These roading alterations are known to cause accidents and delays, yet the Council engineers persist in wasting ratepayers money to continue with the fiascos.</p> <p>Gareth Clark 42 Windermere Road Christchurch 8053</p> <p>021 171 8698</p>
