Please be as specific as possible to help us understand your views.

What do you want the Council to consider? What specific action you think the Council should take? Why should this be done?

- WATER SUPPLY :- I pointed out 5 years ago that if council continued to permit urban growth we would outgrow our water supply. You ignored me then and suspect you will again now but
- \* here goes. Stop urban growth right now <sup>while</sup> our water supply still copes (barely)!
  - \* Your very non specific water strategy contains not very subtle hints of water meter charging.
  - \* I totally oppose this strategy as people in eastern suburbs with good gardens would be severely disadvantaged. With sand for subsoil even mulching etc. only helps to a certain degree. Even hardy shrubs & plants die without watering in our hot summers in the eastern suburbs.
  - \* A much more productive and forward thinking strategy would be to subsidise greywater recycling systems for households, and purchase/installation of rainwater collection tanks for many who would love to help in this way, but cannot afford set up costs!

From my past experiences with council submission & procedures I suspect your agenda is already set and submissions are a necessary formality. I have seen majority submissions ignored time & time again over the years. Still I, and hopefully many others are still prepared to keep trying ~~to~~ not go of major unauthorised expenditure (not ratified by ratepayers) and focus all money on core council services. This would be a major step forward.
