Your Submission:	<p>The high level of the Styx River in the Summer and flooding in the Winter. In addition, the silting up of the riverbed.</p> <p>The action I would like the Council to take is:</p> <ol style="list-style-type: none"> 1. Dredge the river - this has not been done for many years. 2. The floor of the river is higher than it has previously been. This slows down the river flow and causes the silting and consequent smothering of plant life. This is causing the river to die. 3. My family has lived in the area for over 100 years and I own a farm property next to the river. The river has never been in the poor condition it is now.
