*The government, through CERA's Christchurch Central Development Unit, is undertaking a more detailed analysis of the interventions needed to drive and support recovery in the Central City. The Christchurch Central Recovery Plan will outline the scope, location, and cost/risk envelope of the anchor projects identified in a spatial blueprint contained within the Recovery Plan. Where possible, the Recovery Plan will indicate the timing of the delivery of these projects. It will also have an effect on the timing and location of infrastructure, above and below ground, and any development of public spaces, park and streets by Council, to support the recovery of the Central City.*

*The Christchurch Central Recovery Plan itself can incorporate directions to amend the operative District Plan as well as other documents made under the Local Government Act 2002 (including the Annual Plan) and the Land Transport Management Act 2003. The Recovery Plan is, therefore, a key statutory document that can be used to implement recovery in the Central City.*

*As the blueprint will form part of the Recovery Plan for the Central City, the Council cannot make decisions which may be inconsistent with an approved Recovery Plan or its blueprint. In adopting the Annual Plan and budgets, the Council has considered the priority and affordability of investing in the recovery of the Central City. It is acknowledged that once the Recovery Plan is adopted, the range of projects, their timing, location and scope may need to be amended, and future funding arrangements agreed. The Council, and the government acknowledge that this may require the Council to make decisions and or vary its Annual Plan and budget to ensure that the Annual Plan does not become inconsistent with the adopted Recovery Plan. Similar changes may need to be considered by the Council where other Recovery Plans are adopted by the government during the life of the Annual Plan.*
